Toward the end of the high-tempered debate, which began when the senate opened, the lie was bandied with a freedom that was quite startling in the dignified senate, and the climax was reached when Senator Turple of Indiana launched a terrific assault of a most personal character against Senator Aldrich.

BAY STATE LEGISLATURE.

The Meigs Railway System Favored by

Boston, May 1.—The senate cleared its table as nearly as it could, and finding itself with no business on its hands it voted to adjourn until Wednesday.

The bill providing for a reclamation of the Sudbury meadows and the protection of the public health in the valleys of the Concord and Sudbury rivers was passed to be engrossed.

The bill relative to police, district and municipal courts in the county of Suffolk was passed to be engrossed. In the house the transit committee decided against the subway bill and in

favor of the Meigs system. Debate on the question of remodelling the state house was resume!, the time for taking the vote being extended from 3 to

4 o'clock. The vote was taken at 4:10 o'clock, the question being on the rejection of the bill, and by a viva voce vote was de-clared carried. The rising vote was 130 to 50 in favor of rejecting the bill. The year and nays were then taken, and resulted 128 to 52 in favor of rejecting the bill.

Mr. Wellman offered a resolution for national legislation for suppression of the lottery traffic, in view of the removal of the Louisiana lottery to Honduras. Numerous remonstrances against the

subway were received and placed on file. The committee on finance reported a bill providing for bonds to the amount of \$700,000 for building and completion of the Medfield insane asylum.

The bill to incorporate the Drawbaugh Telephone and Telegraph company was passed to a third reading without debate. The bill providing a penalty for persons furnishing libellous articles to newspapers, magazines, etc., was rejected. The bill providing for a Suffolk county

reformatory was passed to a third read-The report of a committee (leave to withdraw) on the petition of the Old Colony and Interior Canal company for an amendment of its charter was ac-

The adverse report of the committee on taxation on the bill to repeal the law exempting mortgage notes from taxation was accepted.

THAT STRAY RYE LOAF.

Now Profusely Tagged.

The stray loaf of German rve bread which arrived at the Rondout office of the American Express company has been making a tour of the Catskills since it left here and looks none the worse for traveling the 200 additional miles. But it had a dozen or more tags added on its Catskill mountain tour. C. E. F. of Pine Hill, the summer

home of Chancellor MacCracken, Professor Henry Morton, the family of the known persons, writes:

If this is a sample of the charity bread, Lord pity the poor, for they better be dead. Go ye in peace. Over the signature of Blake, Will, Fred & Co., Bloomville, April 3, 1894, is the following:

This prodigal of noble birth, Now wandering homeless o'er the earth, Was once the flour among the fair, Was bread and raised with greatest care. He kneaded only to be tutored To learn which side his bread was buttered But loafing round this upper crust Neglected duty and was lost.

MORAL. Oh, may it ne'er to us befall, Another Bloomville tag says: ROUGH ON RATS. - Let the oleomarcarine

S. B. Champion, better known as 'Champ,' the veteran editor and proprietor of the Stamford Mirror, tags it as follows: This loaf to Stamford town did try

To be exchanged for good old rye. No go! Cast it again upon the waters,
For it's no use to our sons and daughters.
You may think it rather queer,
Columbia, Yet we've no need of it here. We've milk and honey now on hand, So send it to some poorer land. The editor of the Hobart Independent

Take it un tenderly, lift it with care. Pass it on D. H., nor charge even half fare. Protect it from robbers, train smashers, meal Let it circle the globe, nor once miss its con-

nections.

Boys, if you're inclined to wed, Hunt the girl who made this bread. Auburn ringlets, eyes of blue, Dimpled cheeks and heart so true, Voice angelic, form divine, Round your heart will often twine. But you'll find long ere your dead They "ain't in it" with this bread.

The Roxbury agent adds the follow-The story of this loaf of bread By poets has been told, But now it's here in Roxbury, The birthplace of Jay Gould.

Station Agent Broderick will retain press office and examined the mysterious loaf and scanned the 50 or more tags and labels. The proprietor of a New York museum has offered \$50 for it, but the loaf will continue on its journey. — Kingston (N. Y.) Dispatch.

ANOTHER FLYING MACHINE

street, after four years of hard work, has completed an invention which he hopes will make him famous. Mr. Carrol conceived the idea that he could

pleted and tried a few days ago, and it worked successfully. The machine, which is a neat piece of mechanism, weighs about 40 pounds and is made of sheet iron. It is capable f carrying about 250 pounds weight. Mr. Carrol tried the machine and worked it very easily and rode through the air at a height of about 50 feet for quite a distance. He was a bit bashful in at-

tempting the trial in daylight, so he did it after nightfall. The inventor has an idea that with some alteration he can contrive a machine which will be capable of traveling at least 80 miles an hour, and that he will also be able to continue this rate of speed even against a strong wind. Some day shortly he intends to give a public exhibition of his new machine, and Cincinnatians will then be afforded the novel sight of seeing a man flying through the air like a bird. Mr. Carrol's machine is boxlike in form and is propelled by means of rotary shuttles .-

Cincinnati Tribune. Wedding Toll In England.

A curious but rather inconvenient custom of exacting toll from newly married couples appears to survive at Wilsden in the Bradford district. The other day a marriage took place in the Congregational chapel, and on the happy pai emerging from the building they found the way to their waiting cab barred by a number of women, who had tied their aprons together and stretched them across the gateway. When these were satisfied with a douceur and the calfwas gained, progress was again hindered by a couple of carters, who had drawn their teams across the road, and who also exacted toll. Sometimes, it appears, several cords are drawn across the road at intervals along the route, and the inroads on the bridegroom's purse are thus considerable. — Westminster Gazette.

Of A 'vantage to Criminals. A curious effect of the Vatican's reusal to recognize the Italian government was noted a few days ago. A Vatcan official embezzled 13,000 lire and lisappeared. No notice has been given to the Italian authorities, but the papal nuncios abroad have been notified in case the defaulter appears in any place under foreign jurisdiction. The crimi can live in Rome undisturbed as long as he chooses. -Rome Letter.

The soil used in its construction was originally the ordinary black adobe, such as is found in the fields surrounding the mound, but now rendered much lighter by the admixture of the ashes from a thousand campfires. It was evidently taken from the territory immediately surrounding the mound, and in process of time the great trench thus formed became a swamp with i's characteristic growth of long grasses and scrubby willows.

Diligent inquiry among the older residents of the neighborhood has failed to elicit anything trustworthy concerning its history. There is a dim tradition indeed that when this region was first visited by whites the mound marked the site of a flourishing Indian village, but it is impossible to say just how much credence should be given to this story. Nothing as yet taken from the mound would indicate that its builders had ever had any dealings with the representa-

VICE IN HIGH PLACES.

London's Personal Purity Society Threatens Some Startling Exposures.

The appalling report which has been circulated in the clubs for several days has caused more commotion in the smoking room of the house of commons than even the excitement of the threatened political crisis. It is asserted that a certain Personal Purity society several weeks ago put a dozen prominent statesmen of both parties under secret espionage, and all their comings and goings have been watched in order to see what company they keep, and whether club and political duties account for their late hours. In fact, a great mass of material has been gathered for another exposure of vice in high places.

Nobody pretends to give the names of the six Liberal and six Tory members certain parliamentary circles. It is suspected that the plot has been prematurely exposed, and so the execution of the plan will be averted. It is doubtful if such a crusade would meet public sympathy just now. ### WHAT IS MAL-NUTRITION?

Mal-nutrition means that the food you eat does not nourish you. The plain English of it is starvation.

Everybody who is thin suffers from mal-

Everybody who is getting thinner than he ought to be suffers from mal-nutrition.

Doctors have given it many learned names; Anæmia, Dyspepsia, Phthisis, Diabetes. It is all mal-nutrition. is all mal-nutrition.

To learn how to cure a disease we must first find out the cause of it. The cause of your food not nourishing you? What can it be that you do not digest it? And how can we possibly help you, if you cannot digest your food? By giving you food that is already digested.

Cod liver oil and other fatty food is often given to people who suffer from mal-nutri-

given to people who suffer from mal-nutri-tion. But it never does them any pernan-ent good. The reason is plain. Fats and oils are the most indigestible of all foods. They cannot be pre-digested. You cannot help a tired horse by giving him more work to do. Nor a tired stomach either.

Nor a tired stomach either.

If your stomach cannot nourish your body with ordinary food, you must take food that will nourish it in spite of your stomach. PASKOLA is such a food.

If PASKOLA were a fatty food it would be no better than cod liver oil. PASKOLA is a starch food. It is possible to pre-digest starch food. PASKOLA is pre-digested. PASKOLA contains natural ferments that help to digest other food.

Of the three great classes of foods, Starches, Albumens, Fats, only one has any effect in the diseases of mal-nutrition: THE STARCHES. If we want to get fat we must have starch food. If we suffer from malnutrition we must have PASKOLA.

PASKOLA is not a medicine, and does not contain any drugs. It is a pleasant, natural food, prepared from richest grains and certain kinds of fruit. It has been prescribed by many eminent physicians, and is rapidly taking the place of drugs in all cases of mal-nutrition.

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The ventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. ## WEATHER AND CROPS

Bay State Has Been Favored Thus Far This Season.

Had More or Less Effect Upon Young Fruit Buds.

BOSTON, May 1.—The United States department of agriculture, in co-operation with the Massachusetts state board of agriculture, issued today the following weather-crop bulletin for the week ending April 30, 1894, with a general summary of the weather for the winter 1893-4: The weather for the past winter in New England has been generally favorable for ATLANTIC - Brancheid's News Agency grass and winter grains, and for fruits, except peaches.

The fall was pleasant and open and much work was completed, and the ground put into good shape for the winter. December (1893) as a month was cold, though the last half was warmer than usual, and the 25th was one of the warmest Christmas days for a number of years. The 14th was an extremely cold day; but through all the coldest weather the ground was well covered with snow throughout New England and comparatively little damage was done. The precipitation was slightly in excess, except in western districts.

Maine's Low Temperature.

January was mild in all southern sections, but was cold with strong temperature ranges in the extreme north. On the 10th and 11th the temperature fell to 30° or 40° below zero in northern Maine, but there was a fairly good covering of snow, and there has been no indication of injury to grass or grain roots or fruit. The ground was not so well covered in the south, but the cold was less intense and probably nothing suffered. February was the "winter" month of

the season, and gave much stormy, cold weather. The 24th was the coldest day for the month, and in many places the coldest for years. At Provincetown, Mass., on Cape Cod, the temperature fell to 1º below zero-the lowest ever recorded by the present observer. Along the southern and eastern coasts the highest for the day was from 5° to 12° above zero, while in western Massachusetts, Vermont and New Hampshire the warmest part of the day showed from 4° to 11° below zero. The ground was well pro-tected with snow through all this cold and little damage was done to roots. Fruit growers, however, report much damage to peaches, and various estimates give from 60 per cent to 80 per cent killed. March was extremely warm and dry. All the first two-thirds of the month was unseasonably warm; the snow disappeared rapidly, and buds began to swell and even to start slightly. The last part of the month was colder, with a sharp cold wave on the 27th. Very great damage was done in the central and southern parts of the United States, and at first it was feared that New England had suf-fered with the rest. The following ex-

### BAY STATE LEGISLATURE

Heating of Street Cars-Repeal of the Subway Act-The Longmendow Bill, Boston, May 2.-The house recommit ted the bill for heating street railway cars to the committee on street railways, but subsequently reconsidered its action, and the bill was passed to a third

reading.

The committee on transit reported a bill for the repeal of the subway act, also a bill for the repeal of the rapid transit OUR TELEPHONE NUMBER 213-3 act of 1893.

The house passed to be engrossed the Barre

following bills: To incorporate the Barre Water company; relating to recounting of votes, and providing that recounts in city elections and votes cast on the license question be made by the registrars of voters; permitting fraternal beneficiary associations to pay death benefits to any person designated by the insured where the latter has no father, mother, husband, wife, children, brothers or sisters; to es tablish the Suffolk county reformatory to establish standard record inks for pub lie records; to remove the restrictions upon shad and alewife fishing in the Merrimac river; prohibiting any one per son, firm or corporation from becoming surety on more than 10 bonds given by retail dealers in intoxicating liquors.

The house rejected the bill to preven the offensive use of buildings for adva tising purposes.

The house referred the matter of the Torrens system of land transfers to the

next general court. There was a three-quarters of an hour Copeland Street, debate upon the senate bill to incorporate the town of East Longmeadow. The to 78.

Mrs. Livermore on the Bill. quent anti-slavery and temperance advo. ing it.

Even in our license towns it could not be adopted except by majority vote. It would seem therefore, that, first, there is very little chance, even if the bill is enacted, of its becoming operative at present in more than two or three muncipalities; the rest will wait the result in them; and, second, that in those two or three it cannot be worse, but it is likely to be better in its effects than the license system which it will displace. Under these circumstance I am inclined to think that it would be wise to try the experiment, if only as an experiment, in those two or three towns that would give it a chance. Truly yours,

## **PATENTS**

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficience along the property of the alert, and ready to perceive the existing deficience along the property of the affects of the same along the property of the affects of the same along the property of the affects of the same along alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and \*kilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" \*system. Inventors who intrust their business to this class of attorneys do so at business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. The president has sent 100 men here with orders to remain, and the greatest ex citement prevails. The men were brought here by the schooner Sadie, but have not been allowed to enter the town by the British man-of-war Magicienne. The Magicienne is the only war vessel now here. The Nicaraguan troops were taken off from the Sadie by boats from the Magicienne and landed at the bluffs, outside the town, where they still remain.

The accusations made by the Nicar-

aguan government against United States Consul Braida are not believed by the people here, who are very friendly to him, and believe that he is working in the interests of the people here.

Consul Braida's friends do not believe

that he made the disrespectful remarks attributed to him by the Nicaraguan authorities, and allege that the Nicaraguan government is very anxious to get rid of Consul Braida and British Consul Bingham, who are new men, not thoroughly acquainted with the situation and not disposed to lend themselves to any schemes of the government.
It is claimed that the government hopes

that they may be replaced by men who can be more easily manipulated, and will aid in turning the Mosquito reserve over to the Nicaraguan government. The American citizens of Bluefields have sent the following letter to Consul Braida: Braida Exonerated.

To Hon. S. C. Braida, United States Consul: DEAR SIR-We are reliably informed that Minister Baker has notified you of the withnumerous complaints and protests made by American citizens residing in this territory, interest himself in a mild and conservative

As law-abiding citizens we have approved of and followed your advice; though our interests and lives have been menaced by so doing. During the times of greatest excitement you have been foremost in efforts to keep the peace and quiet the people, and at times you have even partolled the ple, and at times you have even patrolled the streets, quieting the excited populace. Thanking you for the actions you have taken and trusting that the American government will find it necessary and right to endorse such actions and enforce what claims you have made in our behalf we are

POLICE LOOKED ON

While a Cleveland Mob Wantonly Distroyed Railroad Property.

CLEVELAND, May 2.-The unemployed of Cleveland celebrated May Day with a meeting, a procession that was marked by several riotous demonstrations, and by listening and to applauding a rank anarchist address on the public square when they had finished their marching.

The procession was composed of many thousand men and boys, mostly foreigners. They had not gone a mile before the procession collided with an electric car. The motorman refused to stop when com-manded and the car was wrecked. A few minutes later another car was met. A policeman commanded the mob to give away. When they refused to do so he fired his revolver into the air. Many of the marchers drew pistols and began firing, at least 100 shots being discharged, but nobody was hurt.
The procession was broken up tempor-

arily, but the lines were reformed. Soon a third car was met, and when the driver refused to stop he was felled with a brick. As the procession moved up Superior street, street cars were stopped and all the traffic suspended for a time. The driver of a truck, who refused to take his team out of the way, received a bad wound from an iron bolt thrown by one of the marchers.

During these disturbances not a single arrest was made. When the procession had returned to the square several speeches were made. An anarchist finally made a speech which started another procession. It paraded through the manufacturing district, and it was feared that more violence would be committeed, but nothing more serious than the breaking of a few windows in a factory occurred. THE RESIDENTS and business men along Copeland street are anxiously waiting to see what action the Council will take on widening that street. As it is now the street is very narrow and in some places it is impossible for two teams to pass each other without going on to the railroad

The street is the principal business thoroughfare of the ward and should be widened to 45 feet at least.

It is said that there are several new buildings to be erected along the street just as soon as the matter of widening is definitely settled.

### TEN TO EIGHT.

The Academy Boys Rally Too Late and

The Adams Academy team was defeated at the park Wednesday afternoon by strong aggregation of Veterans, who came fresh from their victory over the Pansies on Patriots' day. The Academy boys could do little with Pfaffmann's pitching, except to knock flies which were captured in the most approved style by Harlow,

Swan, and Randall. The new Adams battery,-Slade pitcher and Sargent catcher-were not in the best

of form but they promise well. The features of the game were a lefthanded catch of a liner, by Pfaffmann; the race for first base by Kent and H. Slade, in which Slade, being some what encumbered by his mask and protector, was beaten; and a pretty catch by E. Sargent. The Academy boys made a sharp rally in

the ninth and made five runs. Holden's hit, which brought in two runs, being very The game was a good one, and the two teams have arranged to meet again on May

### NEW LIGHT AT MINOT'S. The Fixed White Light Gives Way Numerical Signal.

The gleaming lantern at Minot's ledge lighthouse, off Cohasset, now flashes, at intervals of 15 seconds apart, the number "143," which will distinguish it hereafter among the enumerated coast lights along our shores. The change was made Tuesday evening, and the new lens and its mechanism worked very successfully. The old fixed white light which for 34 years has warned the mariner of the perils of Cohasset rocks and ledges is now a thing of the

The light is now numbered in accordance with the scheme of Capt. F. A. Mahan, U. S. A., Engineer Secretary of the Lighthouse Board, an arrangement by which each important lighthouse is made signal its respective number. This plan was submitted to a board of expert officers who recommended that the experiment be tried at the lighthouses of Minot's Ledge

and Cape Charles. The light now gives one brilliant flash, then (after an interval of three seconds) four flashes separated by an interval of one second, then a dark space of three seconds and then three flashes at an interval of one second-thus spelling out the number 143. After a dark interval of 15 seconds, the same flashes are repeated-thus showing twice in a minute the number 143. No 7.00 two adjacent lights have similar numbers.

## TODAY'S COURT.

William Rogers of Quincy was fined \$5 for drunkenness.

Daniel H. Martell was sent to the Housof Correction for 3 months for falsely representing himself to be an officer. Daniel H. Martell is a fellow of medium

height with light hair and mustache. He wears a leather jacket, and light colored spring trousers and brown derby hat. Daniel was not fortunate enough to receive an appointment by the Mayor as a police man but in someway he became possessed of a policeman's badge. This he had attached to his noble breast in just the same manner as regularly appointed officers do and doubtless he felt quite as proud as any of them, at any rate he evidently intended that the coveted piece of metal should do him a good turn.

Thursday evening he started out and the first place he visited was the Hancock House. He entered the house and was met by George Sanborn, to whom he exhibited a badge marked special police, and showing a piece of brown paper, informed Sanborn that he had a warrant to search the house Mr. Sanborn was not fool enough to

quietly submit and told Martell so. Martell insisted that he was an officer and wanted Mr. Sanborn to go to the police station with him. Mr. Sanborn started to do so but the minute the door was reached Mar-The same evening Martell went into the

Italian fruit store in "The Hollow," and exhibited the same badge, demanding Officer McKay arrested the man Wednesday evening, and found a brass badge in

his possession.

Martell's side of the story is that he never had a policeman's badge in his possession, and did not know where the Hancock House was, as he had never seen

Westboro during minority.

EXPLOSION OF DYNAMITE

Destroys the Steamer Cleopatra-Her Crew Rescued by the Nessmore. LONDON, May 3.-The British steamer Nessmor, from Boston, had on board the crew of the German steamer Cleopatra, from Bremen, March 1, for New York, which was on fire and abandoned on

April 22 in lat. 41, lon. 50. The officers of the Nessmore say that the Cleopatra, when sighted, was enveloped in flames. The Nessmore bore down upon her, and when about three miles of her a terrible explosion was heard and flames and sparks were seen to rise several hundred feet above the burning vessel.

When dawn approached, the crew of the steamer discovered a quantity of wreckage floating near by, and soon after a small dingey which contained 20 of the crew of the Cleopatra. These were res

The captain of the Cleopatra informed Captain Hargreaves that the fire was discovered at 2 o'clock in the morning and that there was an explosion of 80 cases of dynamite at 4:45 o'clock. The lifeboats burned before they could be launched and the crew barely escaped with their lives in the dingey. When the Nessmore resumed her voyage the Cleopatra, with the exception of the mizzenmast with the yards attached, had entirely disappeared. The wreck lies in a position where it will be dangerous to navigation.

Connellsville Coke Plant. MT. PLEASANT, Pa., May 8.-The first attempt to introduce dynamite in behalf of the coke strikers was frustrated here yesterday. A week ago General Superintendent Ramsay of the Southwest Connellsville Coke company got reliable information that the strikers intended blowing up his company's plant near Norwood. Mr. Ramsay at once consulted with the sheriff, and, as a result, suspected parties were put under the closest surveillance, which ended in locating them while putting the finishing touches on a bomb in the woods, a half mile north of town and

less than a mile from the shaft which the infernal machine was intended to destroy last night. The bomb was wire covered and filled with dynamite, hidden in a pile of rails, and was taken along with the prisoners to the Greensburg jail. Its weight is given at 20 odd pounds. The prisoners are William H. Davis, a younger brother of the imprisoned United Mine Workers' president; William McCracken, both of this place, and two foreigners. Davis and McCracken claim they had no hand in making the bomb and were present by

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the heusehold, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. ## MILITIA UNDER ARMS

Prepared For Emergencies Which May Arise at Cleveland.

UNEMPLOYED INDULGE IN RIOTS

From Earning a Living.

CLEVELAND, May 3. - The disorders which began with the May Day demonstrations of the unemployed culminated yesterday in open riot. There were three separate and bloody conflicts between the police and the rioters, and troops are under arms ready to respond to a call in case of emergency. The worst is believed to be over, however.

The trouble began when a mob of about 2000 started to raid the factories in the flats and drive from work the men em-ployed therein. The first attack was made at the Variete iron works. The windows of the factory were smashed with stones and bricks and the workmen fled in a panic.

The rioters proceeded to the Upsilon bolt works, where 1600 men were induced to quit work before the officers arrived. When the police came upon the scene the men made a stand, and hurled bricks and stones at the officers. Orders were given to charge them with clubs. The rioters ran like sheep at the first assault, but the leaders succeeded in rallying them upon the Abbey street viaduct, a bridge about 1000 feet long. Routed by Police.

Squads of police coming up at both ends of the bridge penned in the crowd, and they were forced to fight their way out. They made a rush for the officers but at least a score of them were clubbed unmercifully before they finally succeeded in getting away. During this conflict two anarchists were arrested, after a terrific struggle on their part.

One of them, Thomas Moore, an old man, was clubbed into submission and taken to the station in a patrol wagon, cursing the police and declaring that it was the happiest day in his life.

The firmness of the police had a good

effect, for it resulted in scattering the rioters in all directions.

In the south end of the city at the same time a mob of 500 drove the workmen away from the United States salt works and were about to make another little raid. They were met by Police Director Herbert and 10 policemen, who clubbed them until they were glad to run. At least 30 men were injured in this melee,

but the mob was dispersed. Mayor Blee announced yesterday after-noon that no more rioting would be per-

JOURNAL FOR MOTHERS-IN-LAW. Paris Editor Starts a Weekly Devoted to Their Interests.

Paris has a new periodical entitled Journal For Mothers-in-law. The editor says that his object is to defend the social interests of mothers-in-law, and to correct their faults as far as possible by means of friendly criticism.

One article in the first number of this novel weekly is on "The Ideal Motherin-law." Another is under the headline, "A Misunderstood Mother-in-law." The author of the latter article is a woman, who complains that her son-in-law has been so prejudiced against her by current jokes concerning mothers-in-law that he suspects her most unselfish moadvice or assistance.

In the prospectus of future numbers the editor says that eminent writers have agreed to contribute articles on "The Young and Coquettish Mother-in-law,' "The Beautiful Mother-in-law;" "My Second Mother," by a man who has fallen in love with his wife's mother; "The Mother-in-law Without Tact," and "How to Make a Mother-in-law Useful About the House."

The editor has confidence that his journal will find ample financial support among the reading mothers-in-law of Paris and its suburbs, who, he says, number a hundred thousand or more. His associates on the Paris press are less sanguine of success. They point to the failure of The Ballet Dancers' Journal, which got no further than its fifth num ber, and to that of The Chorus Girls Weekly, which lasted but a month or two, and prophesy an equally short existence for the new enterprise.

AN EDIBLE NEWSPAPER.

The Brilliant Idea of an Australian to Make Heavy Editorials Go Down.

An Australian confectioner has had brilliant idea which may revolutionize journalism and render coupons obsolete as a means of increasing sales. It has occurred to this confectioner to make an edible newspaper. He has accordingly got out a sample number of a journal, which is printed upon a thin paste of dough instead of upon paper and with liquid chocolate instead of ink. This singular newspaper, which contains the most important news of a certain day, is made of a very palatable paste indeed, and when the purchaser has read the news he can eat up his newspaper. In this way the publisher of the paper may reasonably hope that if he mixes his dough with skill and honesty and cooks it to a turn his paper will be liked, because if its news and editorials are not relished its substance may be.

On the other hand, if he neglected his paste and made it too "short" or too tough or neglected to put in salt enough to make his paper relish, the literary matter might redeem the carelessness of the cookery with certain classes of the population. People, however, would probably soon come to demand that both the literature and the cookery of the newspaper should be exactly to their taste, and a new cause for complaint on the part of readers of newspapers would be introduced. —Boston Transcript.

Income Tax Defended. James Carter made the principal speech of the evening. He defended the income tax as the most just and equitable form of taxation. There were manifestations of approval and disappointment when he said this, a foreboding of the tumult that broke forth later when Mr. Coudert took the opposite stand to Mr. Carter. Mr. Carter also denounced Senators Hill and durphy for their attitude toward the Vilson bill. This seemed to please the

large audience hugely. Oscar S. Straus, ex-minister to Turkey, said that the senate of the United States stances combined. While hunger, misery to bribe the court than a million of wageearners are out of employment the senators abuse their inctions and their privileges to obstruct egislation and delay the decision upon which depended the necessaries of life to hundreds of thousands of men, women and children. Then he pitched into Senator Hill and said that the triumph of such men was an infamy to the party.

The Resolutions. Resolutions in substance as follows

"That we should prefer a more consistent measure of tariff reform than is now pending, but we urge that it be passed to a final vote, so that we may be relieved from the exactions of the McKin-

"That, while we are opposed to the income tax provisions, we are more opposed to the existing system of tariff taxation, which casts on the working classes ninetenths of the burden of taxation and ex-Children's Suits. tenths of the burden of taxation and extorts from them an enormous tribute for the benefit of a few. That we desire the income tax clause stricken out. We deem their retention no excuse for the vote of any Democrat against the bill as a whole, and demand that every Democratic senator and Republican ought to vote for the repeal of the McKinley laws. When the bill to incorporate the

Cape Cod Southside railroad came up, Mr. Darling, who had given notice of an in-

tention to amend by adding an anti-stock-

watering clause, did not move the amend-ment. This brought Mr. Myers to the

floor, and that gentleman made a violent

attack on the effort which he said is

being made to defeat the anti-stock-watering legislation. "I was told last evening," said Mr. Myers, "that it is

rumored that the job is already set up by which the general bill is to be killed in the senate. Is the senate to again be

called the graveyard of the people's legis-

### NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceived. ing the remedy to overcome existing dis-crepancies. Too great care cannot be exer-cised in choosing a competent and skilful attorney to prepare and prosecute an appli-cation for patent. Valuable interests have been lost and destroyed in innumerable intances by the employment of incompetent counsel, and especially is this advice appli-cable to those who adopt the "No patent, no pay" system. ## QUAY KILLING TIME.

Newspaper Extracts Form a Large Part of His Speech.

A DEMOCRATIC TARIFF CAUCUS.

Senators Will Support the Bill as It Now Stands.

WASHINGTON, May 4.-Senators Chandser and Quay occupied the time of the senate, the former with an impromptu speech of an hour and the latter with a continuation of his prepared speech.

There were no features worthy of special mention. The Democrats assert that Quay's speech, with the frequent reliefs resorted to to afford him breathing spells, furnishes conclusive evidence that the Republicans have begun a filibuster such as marked the progress of the long struggle ower the repeal of the Sherman law last summer, and the protracted fight on the part of the Democrats against the federal elections bill in the Fifty-first

Several times yesterday Quay sent to the clerk's desk long newspaper extracts to be read, and at other times Gallinger of New Hampshire read whole chapters from the multitude of volumes that lay on Quay's desk. All this is permissible under the rules of the senate. At other times some Republican would suggest the absence of a quorum. This would necessitate a rollcall and consume 10 or 15 minutes.

But One Dissenter.

By a vote of 37 to 1, six of the 44 Democrats being absent, the Democratic senators, in caucus yesterday, adopted a resolution agreeing to support the tariff bill of the finance committee, including the Colts should be haltered when they are a compromise amendments that have been week old, as it tends to tame them at an early age.

agreed upon by the many conferences of Democratic senators during the past two

The resolution was presented by Senator Gorman and discussed at some length, as the session lasted from a few minutes after 4 o'clock until nearly 7. The six absent senators were Mills, Murphy, Lindsey, Irby, Butler and Gibson. It was claimed that they were all accounted for, and assurances were given that they would support the tariff bill.

The only persons in whose absence there the past season was Perplexe, whose stock won \$126,080 in stakes.

The animals that pull down the purses at the call for caucus was sent to his house. It is believed that he has some objections to the concessions that have been made, but he has previously announced that he would support any bill that provided for reductions in the present law.

Senator Murphy's caucus notice was also sent to his residence, as he was absent from the Capitol. His position has all along been one of doubt, but several favor of the bill. The other absentees are either out of the city or failed to receive notice in time. None of them have been counted as against the bill, and it was that a picture of the girl you have been so said that they would endorse the action

The Arguments.

In presenting the resolution and stating the object of the caucus, Senator Gorman said it was necessary to make Fiddleback—Come to think of it, there are quite a number of things here I haven't support of the party, and he further asserted that it would need a Demi concessions in order to secure the united ocratic majority to pass the bill. He stated that concessions had been made on all sides, and it was believed that the measure, with the proposed amendments, would now meet with the support which was absolutely necessary to pass a Democratic tariff bill.

Senator Jones of Arkansas, who has taken the most active part in the preparation of the amendments known as the compromise bill, made a speech in which he explained at length the proposed amendments and told why they were necessary. He did not discuss nor read all of them, but selected the most important and those affecting the greatest interests.

Senator McPherson spoke in support of the resolution, and dwelt at some length upon the concessions which northern and eastern Democrats had been obliged to make and what they had to give up in order to meet the demands of the south and west. He claimed that the concessions that were talked of by the other senators were not wholly on one side.

Senator Hill was not placated. He spoke only a short time, but it was long enough for him to convince the caucus that his vote would not be for the bill if the income tax remained in it. He said his position was well known. He had made his statement before the country and there was nothing to add to what he had said. Whatever the so-called concessions might be, they could not compensate for a rider in the bill which the needs of neither party demanded. Without saying so in direct terms, there was none who listened to him who believed that he would support the bill.

The conferences that have been going on among the Democratic senators for two weeks had given the leaders information as to how the different senators stood, but they want official caucus action upon what had been agreed to in the conference. The roll was called in order to place all on record, and 37 senators voted in favor of the resolution and one senator (Hill) against it. The vote was received with general gratification, as many of the senators believed that it signified that the tariff bill would pass.

In the House.

No business was transacted in the morning hour in the house, the regular order being demanded when it was sought to obtain consideration of a bill.

The time of the house from 12:24 until 4 o'clock was taken up in the consideration of the river and harbor bill. Speeches were made by Messrs. Cannon, Weadock,

At 4 o'clock, Mr. Catchings sought to have general debate closed at 5 o'clock. Some opposition was developed among the Republicans, when Catchings moved to close debate in 20 minutes, and on this to close debate in 20 minutes, which Some opposition was developed among was ordered, and his motion was agreed More Reliable than either Tansy

WASHINGTON, May 5. - The frequent showers of rain that fell here yesterday dampened to a considerable extent the ardor and enthusiasm of the army of the commonweal. The men are not adequately protected against the weather and present a very forlorn and dejected appearance. Their stay in Washington,

apparently, has not improved them. The rations furnished are very simple and limited. The feeding of over 500 men, besides a number of horses, requires considerable activity on the part of those General Coxey was not at the camp dur-ing the forenoon, but Carl Browne was on hand part of the time, and when he departed left Marshal Broderick in charge. ## THE RIGHT KIND OF CITIZEN.

A town or city is just what its citizens make it. Given the right sort of people, and a desert waste will be transformed into a garden that shall bloom worship at 10.30 A. M. Preaching by the sort of citizens, and all the advantages of soil, climate, geographical position and wealth will go for naught. Manufactures do not make the city. It is the city that makes the manufactures. The stockyards and the grain elevators did not make Chicago; pork packing did not make Cincinnati: a railroad center did not make Indianapolis. In each case the city is the cause and the business the effect. These cities had public spirited

The right kind of citizen believes in well lighted streets and good sidewalks, for he knows that vice and crime hate gaslight and electric light almost as much as they do daylight, and that they delight in darkness. He also knows that these things give a good impression to strangers. The right kind of citizen also is fully awars of the fact that no expenditure brings so great a return to the citizen as that which he pays in taxes provided it be honestly and judiciously

The wrong kind of citizen sees none of these things and does none of them.

Municipal Electric Conduits-The Beforendum Amendment-The Gypsy Moth. Boston, May 5.-The house engrossed the senate bill to authorize the Malden, Melrose and Stoneham Street Railway company to locate and construct its railway in the cities of Medford and Somer

BAY STATE LEGISLATURE

The house on Thursday afternoon rejected the bill for the construction by municipalities of underground conduits for the carrying of electrical wires, by a vote of 61 to 73. Mr. Myers yesterday moved a reconsideration of the vote, and that his motion to reconsider be postponed for one week, and in the meantime, if it is de-sired, the bill will be amended so that it will exempt towns. The question was debated at length, and the house-79 to 44refused to reconsider.

The house discussed at length a pro-

posed amendment to the constitution providing that the general court shall have power to refer the adoption or rejection of any proposed law to a vote of the qualified voters of the commonwealth, or that portion of the commonwealth to be directly affected thereby.

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to associate the same larger than the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deciciences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. Found In New York, Boston, May 7.—In September last Mrs. Jessie Mackenzie, a bewitching young woman of 24 years, was arrested in this city charged with defrauding two hotel proprietors. She was taken into court, but several friends came to her assistance and no trial ever took place. She was allowed to depart on bonds given by a well-known Boston merchant. The arrest created a sensation at the time, as her family was one of the best connected in this country. Very soon after her appearance in court she suddenly disappeared, and it is alleged that she defaulted her bonds. Yesterday news came from New York that she had been found in that city by a man, said to be the representative of her bondsman, who has been looking for her for some time, who would shortly bring her to Boston, where proceedings would be in-

stituted against her. Pennsylvania's Big Storm. WILKESBARRE, Pa., May 7 .- Yesterday's storm caused a loss of over \$100,000 in thi

## PATENTS

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor time and expense. The order to save labor, time and expense. The political change in the administration of government does not affect the progress of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and object to the patent is never to get an allowance and object to get an allowance and obj quick endeavor to get an allowance and obtain the fee then due. MEMBERSHIP LARGELY INCREASED.

Rhode Island.

PHILADELPHIA, May 8.—The fifth annual delegates present. The object of the convention is to discuss and pass upon matters which will tend to unite the workmen of that department of labor for mutual protection and the improvement of their position.

The morning session was devoted to the appointment of committees on finance, law, resolutions, legislation and press. During the afternoon session the

reports of officers were heard. The especial objects to be considered are the shortening of the hours of labor, the framing of the national factory laws and the establishment of a uniform wage rate on such a basis as is possible.

Announcement was made that the strike at the Washington mills at Lawrence, Mass., which has been going on for the past 12 weeks, has been settled and the 1200 employes will go back to

It was also stated that a misappre hension exists as to the condition of affairs in Pittsfield, Mass., to which point operatives from Philadelphia and other sections of the country have been flocking on the false representation that there is work for them there, only to find themselves stranded in a strange community International Union Proposed,

During the sitting of the convention steps will be taken toward the formation of an international union of textile workers, and to that end Robert A. Howard secretary of the Spinners' union of Fall River, Mass., will be delegated to repre-sent the American textile workers at the proposed conference, which will include not only British textile workers, but probably representatives from France, Belgium, Germany and Austria as well.

It is expected that the National Textile union will be augmented by a combina-tion with the National Silk Workers of America, which comprises 5000 members. It was stated that the latter organization is awaiting the outcome of the present convention to take formal action in the

conventions. The Transfer of Power,

In addition to favoring the limiting the hours of labor to 55 a week, which will doubtless be adopted, the conven-tion will also take into consideration the transfer of a portion of the power of the national union to district councils. The change is contemplated because the major body is becoming unwieldly and better results are expected to result from the establishment of a district system The national board, however, is to have the whole power of sanctioning strikes, so that two big ones will not occur at the

The place for next year's meeting was decided on. Providence was the city selected. The first Monday in May will be the date. It was shown that the organization has largely increased its membership, and now has over 40,000 workers in its ranks. Rhode Island has been especially active of late, 26 new unions having been formed in the past few months. The increase in the membership is drawn largely from the cotton industry employes, and in this city the lace curtain makers have joined the union. The finances were stated to be in a satisfactory condition.

### Editorial Comment.

FRANKLIN STREET and Independence avenue seem the only proper route for a street railway between Quincy and Braintree. The turn into Water street is in itself sharp and dangerous, particularly as Claims, passengers are often obliged to stand. Then if the Old Colony tracks were blocked Keith was submitted and approved. Braintree cars would also be blocked. The track should be in the middle of of widening at the narrow point. WEATHER AND CROPS

Past Week Unexceptionally Favorable For Farm Work.

A FULL FRUIT CROP PROMISED.

A Remarkably Early Season

In the Old Bay State. Boston, May 8 .- The New England

weather service, United States weather bureau, issues the following weather crop bulletin for the week ending May 7, The weather for New England for the

week just passed has been exceptionally favorable for all farm work and for the growth of crops, except in a few localities in the south and in central Maine, where the want of rain has been most felt.

Light showers fell along the Maine coast, in the northwest, and in the extreme north on the 1st and 2d, and again along the coast and in the southern states on the 4th, but central New Hampshire WANTED-Lady or gentleman to assist in office. Salary \$750 with chance to increase and position permanent, if suited. Railway fare paid to office if engaged. Entailway fare paid to office it engaged to office it engaged to office it engaged. the south on the 5th, and a quite general rain fell on the morning of the 6th. This last rain, being followed by generally warm weather, has pushed all crops and vegetation along wonderfully.

The ground has been in excellent con-dition for cultivation during the week throughout New England, and the fine weather has been improved in preparing the ground and putting in the seed. The season is everywhere reported from one to two weeks ahead of the average.

In Maine grass is looking exceptionally well, except in parts of the Penobscot valley, where its growth has been retarded by the lack of rain, and where some newly seeded pieces are looking rather poorly. A large share of the grain has been sown, especially in the easter districts; the acreage has been increased in places. Potatoes are being rapidly planted all over the state and under very favorable conditions. The land for corn and other crops is being fitted, and a very little corn planting has been done. The sweet corn acreage will be increased in southern Piscataquis county. Fruit buds are swelling rapidly, and a full blossom is promised.

New Hampshire In New Hampshire the ground is in splendid condition and much work has been done on it, except in the most backward sections. In parts of Sullivan county the last year's seeding of clover has been badly hurt on flat lands. The grain has been largely sown on the warm sandy lands in the Merrimack valley, an a large share of the potatoes have leen put Throughout the southern countie grain is generally sown and planting has been begun. In less favorable sections in the central and northern districts work is in progress on the land, but no great Fruit is very promising and has advanced remarkably in the past few days. In the extreme south, apple, pear and plum are in full bloom. At Brookline, in southern Hillsboro county, the plum has suffered from some unknown cause and shows poorly. Plum and cherry are gen

trees to be two weeks ahead of the aver-The weather in Vermont is reported warm and dry until the end of the week. Grass has grown very fast and young stock has been turned to pasture, al though many are still feeding from the barn. In the south, in the Connecticut valley, some corn is in the ground, and many acres of potatoes are planted; early sown seeds are up and looking as well as need be. The correspondent reports that the grass looks like the last of May. In the center and northern parts of the state gardens have been planted, and while potatoes, oats, etc., have been put in by some farmers, others are preparing the land. Apples are coming into blossom in

the south, and plum and cherry in the Massachusetts.

It has been very warm and dry dur the first part of the week in Massachu setts. The showers of the last part have wet up the top of the ground, but have not penetrated to any great depth. On all early lands in this state the grain has been sown, most of the potatoes and some of the corn planted, while the preparation of the ground for the early planting of corn and other crops is general The correspondent at Blandford report that the season is remarkable, as it fully as early on the hills as it is in th Connecticut valley. In the eastern Con necticut valley early garden crops of all kinds are coming on; asparagus is extra fine; currants indicate a good crop.

north.

The acreage of potatoes has largely in creased in numerous places. Rye will b ready to cut in many fields this week The cranberry vines are looking well Early apples and other fruits are gen erally in bloom. At West Newbury, in Essex county, the early apples are in bloom, but the Baldwins are reported backward; here the tent caterpillar has made its appearance in "unusually large numbers." In the Sunbury river valley very few nests are to be seen, and no other correspondent mentions this pest The warm days last week were improved by many by grafting fruit trees.

Rhode Island and Connecticut. In Rhode Island and Connecticut, especially in the latter state, the ground was so dry that seeds germinated very clowly, and crops in places made a slow growth until the end of the week. All fruit is in bloom and a good set is prom ised. Peaches are an exception, however, yet there has been a marked improvement in this crop in the past week.

In New Britain the late varieties are

showing more blossoms, and at Meriden the correspondents estimates fully 4) or 50 per cent of the usual crop, unless they are further injured. Strawberries are blossoming very full in the southern Connec ticut valley. Grain is mostly sown and in early fields s coming up with a good stand. Rye is heading. Potatoes are mostly planted

with a largely increased acreage reported

they are coming up in early fields. Early sweet corn is coming up in the Connecticu valley, but generally the corn crop will

not be put in until this or next week.

### **DISCOVERIES IN CONSUMPTION**

What Dyspepsia has to do with it.

Old school and new school methods. It is, to say the least, peculiar that all consumptives suffer from dyspepsia. Dyspeptics are not always consumptives, but they are quite likely to become so, if they don't cure their dyspepsia.

Dyspepsia is more like consumption than any other disease known. It is, in fact, one of the most fruitfal causes of consumption. The dyspepsia in consumption is as dangerous as the lung trouble.

There are no drugs known that will cure the dyspepsia of consumption or enable patients to properly digest their food, and thus gain flesh, except Paskola, which is a Pre- WEST QUINCY-Ceram's Periodical store, Digested Food.

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiv-ing the remedy to overcome existing dis-crepancies. Too great care cannot be exercrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. ### THE JURY SYSTEM DISCUSSED.

Mr. Faxon Interrupts and Chairman Threatens too Call Police.

Henry H. Faxon was in his element last evening, for there is nothing he likes better than to stir up a mass meeting. The Journal has reported the event fully and it is reprinted below making interesting

Invitation or not, when the "remon strants" ascended the platform Mr. Faxon was not among them. He had taken an end seat in the first semi-circular row on the floor. With him sat 100 men, mostly foreigners. Obviously their ideas were foreign made; certainly they were expressed in foreign accents.

The rap for order was given by James F. Morton, Jr., who represented the Second Nationalist club of Boston. He read the address to the people. The address was entitled "The Jury System-The State Senate Strikes a Blow at Trial by Jury-Despotism Rears Its Ugly Head." In the address were epitomized all the protests which had hitherto been made both by Address, Albertina Street, Quincy lawyers and by "friends of the people." The names of the 14 State legislators who compose the Joint Judiciary Committee were given, it being noted that Senator Cronan alone opposed the bill.

The storm lashed the waves of the serene senate into something of a fury, and before quiet was restored Senators Palmer, Hale and Morrill became involved. This was the nly marked feature of the day's proeedings. The remainder of the day until the senate went into executive session a few minutes before 5 o'clock, was occupied by Mr. Quay in continuation of his serial speech, with frequent

rollcalls to give him breathing spells. The bill for the erection of a public printing office in Washington occupied the attention of the house during the greater part of the day, and came to a rather ignominious ending. A number of amendments and substitutes were offered to the first section, providing for the purchase of a site, but the only one which finally came out of the melee was a resolution of Mr. Holman to refer the question to a commission, to consist of the common public buildings and grounds, with instructions to select a site on ground now owned by the government. The naval appropriation bill was called up and briefly explained in some of its parts by Mr. Cammings, but the house adjourned before he had concluded his

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the accessions to of canoes, sail and rowboats. the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing dising the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and kilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at siness to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. Vote Down Propositions to Increase Per Capita Tax.

CHANGES IN THE CONSTITUTION

Committee on Law.

PHILADELPHIA, May 9 .- At yesterday's session of the Textile Workers' convention the program of independent political tction promulgated by the American Federation of Labor at its Chicago conrention was endorsed. The proposition to increase the per capita tax was voted down.

A resolution was introduced from Union No. 21, of Rockville, Conn., asking the endorsement of the body for the Socialistic Labor party. It was decided, however, that the endorsement by the convention of the 10th plank of the Federation of Labor platform perforce included the action desired by the Rockville union.

A proposition introduced by Union No. 13 that the National Union of Textile Workers of America affiliate with the American Federation of Labor was re ferred to the committee on resolutions.

The question of the committee on law then came up for action. A proposition for a number of changes in the constitution had been presented by Union No. 8 of this city, the most important of which related to the executive board, its personnel and its headquarters.

The changes submitted asked that it be increased from seven members, as at present constituted, to nine, viz: A president, vice president, secretary, treasurer and five members-at-large, and that it "shall not exist longer than two years in any one place, to prevent disquietude and clique government."

Wind swept the flames directly down the principal street, and sparks from the burning buildings set fire to many houses remote from the heart of the fire. Seventy-two dwelling houses, including the homes of all the prominent merchants and professional men, were burned, and hundreds of people were forced to flee from houses, leaving everything to the mercy of the fire.

Many people were badly injured by falling timbers, and several are supposed to have met death. It is impossible to give any idea of the horror of the scene or to estimate the losses. The principal places of business were destroyed.

Exciting Game Played by Nines of Adams Academy and Boston College.

DOWNED AGAIN.

The Adams Academy nine was again defeated Wednesday afternoon in a long and exciting game with the Boston College freshmen. The final score was 24 to 20. Both teams batted hard. The one fatal innings again appeared-this time the eighth—in which the game was lost by a combination of timely hits, untimely errors and a pass ball, giving the visiting team to Heights to Milton. Please return to the combination of timely hits, untimely errors are trimmed with black astrakan, either on Beale or Adams street, going from Wollaston Heights to Milton. Please return to twelve runs.

The Boston College nine changed pitchers three times, and had the Academy boys been able to do the same the result might have been different, as Barker's arm gave out at a critical point in the game. The crowd seemed determined to make up for the rattling coaching of the visiting team on Saturday last, for they yelled continuously during the last two innings and did their best to help the home team in that way. The college men played a comparatively steady game however, and deserve credit for their coolness in the midst | Box 25, Wollaston. of the uproar.

## FRAUGHT WITH PERIL

Uncle Sam Should Meddle No Further With Samoa.

AMERICA HAS GAINED NOTHING.

Succeeded In Getting Into an Entangling Alliance.

WASHINGTON, May 10 .- The president yesterday submitted to the senate the correspondence relative to Samoa called for by Senator Gray's resolution of the 6th ult. The correspondence itself is very voluminous, covering about 10,000 pages, and is in itself of little interest, save from an historical view. But in submitting it to the president, Secretary Gresham has taken the opportunity to set out at length his conclusions as to the workings of the

tripartite agreement. This letter of the secretary's is certain to take an important place as a state paper, and to give rise to much discussion and controversy. He gives an his torical review of our relations to the islands in order to exhibit our policy. This he regards as especially important, since, he says, in the case of Samoa, the United States, for the first time, departed from its traditional policy of avoiding entangling alliances with remote lands, and the wisdom of that departure must be tested by its fruits.

The secretary then reverts to the exploits in Samoa of the notorious Steinberger, 20 years ago, and step by step brings the history down to the present time, showing how the United States had repeatedly refused to establish a protectorate, and how it had repudiated the action of some of our consular officers in that direction. He suggests that the first treaty with Samoa in 1878 was incited by our local representatives, and that it was entered into on our part rather from amiability than on account of concern in Samoa.

Coming down to the time of the loss of the American fleet at Apia the secretary says in this history of Our Relations to Samoa:

"Fraught with so much peril to our safety and prosperity, we look in vain for any compensating advantage. So far as the departure from our early and con servative policy had produced any appre ciable result, it had been one of unmit igated disadvantage."

The secretary further declares that we failed to help the natives and promoted no interest of our own. Our trade was insignificant, as is shown by the figures. Then Secretary Gresham describes the present form of government of Samoa and declares that the so-called autonomous government is really a tripartite foreign government imposed upon the natives. He points out the grave difficulties it is now experiencing, and in con clusion asks:

"What have we gained by our departure from our established policy b the expenses the responsibilities and the entanglements that so far have be only fruits?" and further holds that t treaty of Berlin has "not only involve us in an entangling alliance, but has utterly failed to correct, if, indeed, it has n aggravated, the very evils it was designe to prevent.

### NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent stances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. A LIVELY FIST FIGHT

In Which the Major Proved Too Much For the Lieutenant,

CHICAGO, May 10.-Lieutenant Maney, recently acquitted of the charge of murdering Captain Hedberg, has furnished Fort Sheridan with another sensation. Since the shooting of Hedberg there has been ill feeling between Maney and Major Baldwin of the Seventh cavalry. Maney at last called at Major Baldwin's quarters for an explanation.

"I have called see you, major," he said, "in regard to certain remarks you have made about me in relation to the Hedberg affair. I understand that you expressed the opinion that the killing of Hedberg was cold-blooded, and to have advised my ostracism by the officers of the post. Is that true?" "Every word of it," was Major Baldwin's prompt reply, "and now that you

are here, I just tell you to your face that I think you were in big luck when you were acquitted." Some versions are that the lieutenant's right hand sought his hip pocket in search of his gun, while others deny that

the lieutenant was armed. In any event Baldwin landed vigorbody blows with science and precision. But Major Baldwin was pugilistically the better man and clinched with his adversary and choked him into submission, and pitched him outdoors.

Lieutenant Maney failed to materialize

leaked out. Maney was found in close communion with bandages, but refused to talk about the affair. Colonel Crofton denies that any encounter occurred between Baldwin and Maney. The latter officer declared the story untrue. Major Baldwin says the same thing.

### COXEY MUST MOVE.

Commissioners Notify Him That He Is Maintaining a Nuisance.

WASHINGTON, May 10. - The district commissioners have decided that Coxey is maintaining a nuisance by keeping his men in their present camp, and have given him 48 hours to abate the nuisance. Coxey expressed his intention to move when the notice was served, and hinted that he might secure an abandoned baseball park near the Capitol.

COLUMBUS, Ind., May 10.-The advance guard of "General" Jennings' commonwealers, now in camp at Edinburg, broke into the general store of Charles Stine of Edinburg, and carried away \$500 worth of fine guns. LA PORTE, Ind., May 10.-General Ran-

dall and staff were released from custody and discharged on signing an agreement to at once break camp and get out of the county as fast as possible.

TACOMA, May 10. — A special from Yakima says a battle occurred between deputies and commonwealers, in which two deputies were shot, one fatally.

Collision In the Soo Passage. SAULT STE. MARIE, Mich., May 10.-The big steal steamer S. S. Carry, bound down, with ore, and the whaleback steamer A. D. Thomson, bound up, light, came together with a tremendous crash in the Soo passage. The Curry did not sink, but her damage is about \$30,000. The Thomson is very seriously damaged and had to be run aground.

A Peculiar "Mistake." PEORIA, Ills., May 10.-There was a great sensation here when it was learned that Julius Schwabacher, son of a

wealthy distiller, had been caught in the act of burglarizing the house of one of his neighbors. The young man had been gambling heavily. Young Schwabacher claims that he had gotten into the house by mistake. Millionaire Sued For Divorce. PROVIDENCE, May 10.—Carrie B. Fales, wife of ex-Commodore Fales of the Rhode

Island Yacht club, has sued for absolute divorce, on the ground of adultery. Commodore Fales is now on a tour of the world on his steam yacht. Commodore Fales is reputed a millionaire. The couple have two children.

Strikers Breeding Trouble. STAUNTON, Ills., May 10.-Fully 1200 striking coal miners from nearby dis-tricts gathered here yesterday, with more on the road, their intention being to put a stop to work in shafts Nos. 6 and 7 of the Consolidated Coal company. The governor will not make use of troops un-

What Dyspepsia has to do with it.

Old school and new school methods It is, to say the least, peculiar that all consumptives suffer from dyspepsia. Dyspeptics are not always consumptives, but they are quite likely to become so, if they don't cure their dyspepsia.

Dyspepsia is more like consumption than any other disease known. It is, in fact, one of the most fruitful causes of consumption The dyspepsia in consumption is as danger ous as the lung trouble.

There are no drugs known that will cure the dyspepsia of consumption or enable patients to properly digest their food, and thus gain flesh, except Paskola, which is a Pre-Digested Food.

Starch, not fat, is the food for people who are losing weight. Paskola, not cod liver oil, is the modern treatment for consumption. A starch foed made of grains and fruit, ore-digested, like Paskola, is the nearest approach to perfect food for dyspeptics than can be got. The starch in Faskola, being all can be got. Failure of the Compromise Tariff Bill Is Predicted.

COXEY RESOLUTION GOES OVER.

Mr. Hoar Pays His Respects to Western Senators.

WASHINGTON May 11 -- Senator Mills' declaration of his attitude on the tariff is causing the managers of the tariff bill considerable concern. If the dominant party cannot be held together in support of the action of the

committee there is danger that those amendments upon the success of which the ultimate fate of the bill depends may be defeated. Many Democrats, however, do not believe Mills will continue in his room and parlor. They expect to occupy present frame of mind, and that he will it by the first of the month. certainly perform no act that would endanger the passage of the bill.

### The Coxey Resolution.

Again yesterday for two hours the s nate discussed the resolution to investigate the alleged police clubbing ou rages on the occasion of the Coxey demonstration in front of the Capitol. Senators Hoar, Gordon, Teller and Harris were the principal speakers.

"It is needless for me," said Mr. Hoar, drawing himself up and looking about the chamber, his eyes pausing when the reached Mr. Allen and Mr. Stewart, " declare that I sympathize with all m ellows in distress. I sympathize with them a great deal more than some o the downtrodden, in order to advance their disgraceful political ambitions." The galleries burst into ringing applause at this utterance, and in order to quell the demonstration, Mr. Faulkner, who was in the chair, was forced to use his gavel vigorously and threaten to clear the galleries.

### MILTON.

Last Sunday the Congregational church and the Young People's Society of Christian Endeavor elected delegates to Boston Central Conference of the Union for Practical Progress, which meets in Boston May 22. The conference is composed of delegates from all churches, temperance, reform and labor societies who study the sociological needs of the localities and take action to improve them.

"The best method of treating the saloon evil," will be the topic of the evening service at the Congregational church, Sunday. This is in response to the invitation of the Union for Practical Progress, which aims to centre all the moral forces of society against some one specific evil every month. The saloon is the topic for May. The drug store which is to open in Merrill's block is nearly completed.

The Milton brass band has secured part of the upper hall in the Merrill building, which they will have arranged with a band

LYNN, Mass., May 11.-George S. Bar lord, who has been doing business in Lynn as the Lynn Mercantile association, is numbered among the missing. It is claimed by several people whom he had dealings with that he was a rascal of the first water, and that they have been swindled of their hard-earned dollars. His victims claim that his method was to answer advertisements in the Boston papers, inserted by young men out of emcollectors if they had \$200 to deposit as security. Barlord plucked several victims, and it is said the near proximity of an investigation of his methods hastened his departure. It is expected that his relations will settle the debts.

Old Tip Finally Succumbed to Cyanide of Potassium.

POISON HIDDEN IN BRAN BALLS. on the first Monday in Jan of December, as at present.

The Wicked Monster's Remains Divided Up.

NEW YORK, May 12.-Tip is dead. He died from the effects of poison at 4:19 p. m. in an insane asylum. yesterday. After he had given up the ghost the authorities waited an hour to be positive that Tip was not shamming before they permitted the members of the press to view the deceased.

A dead elephant is an unusual thing to see and might draw a crowd of sightseers ago, and since then has lived an exunder ordinary circumstances, but this dead elephant was something out of the usual line. It had been tried ex parte and condemned to death, and had for two or three days after sentence been placed under a death watch, and the public generally were excited over the matter.

Eight men, who had in turn become the master of Tip in bonds, were relieved despondent of their duties and sent into eternity by their intractable charge. The last man, Snyder, saw evidences of Tip's intention to send him on the same road, so to save ex-public printer, is in Syracuse with the himself he became first the accuser and then the executioner of an elephant, whose name and fate have excited the interest of probably 50,000,000 people.

Reed Takes a Turn. Mr. Reed delivered a sarcastic reply to Mr. Cummings. The speech of the gentle-man from New York, he said, was merely a rehash of an attack which he had made on him (Mr. Reed) in the Fifty-first con-gress, when he was unable to reply to them, even if he chose to do so. Repetitions of failures never made success, and he was surprised that Mr. Cummings should resurrect his charges.

"I made no mention of the Biddeford scandal," interrupted Mr. Cummings. "I have never such a large majority as when the navy yards are in the possession

of the Democrats," retorted Mr. Reed.

# NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the Opposite Depot the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised, to choosing a competent and skilful ing the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the parent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N W., Washington, D. C., representing a large number of important daily and weekly papers, as well as general periodicals of the country, was instituted to protect its patrons from the unsafe methods heretofore employed in this line of business. The said Company is prepared to take charge of all patent business entrusted to it for reasonable fees, and prepares and prosecutes applications generally, including mechanical inventions design patents, trade marks labels fees, and prepares and prosecutes applica-tions generally, including mechanical inven-tions, design patents, trade marks, labels, copyrights, interferences, infringements, va-trade marks, labels, copyrights, interferences, infringements, va-labels, and gives especial attention to lidity reports, and gives especial attention to rejected cases. Boston, May 12 .- Some of the police men of station 1, to which ex-Policemar Learned belonged before his discharge from the force and arrest on charge of stealing, went to his house yesterday and made a search of the place. Among the property found stored in the house there were cases of wine, brandy, kitchen ware, icecream freezers, canned goods of all kinds, brooms, tubs of butter and, in fact, almost everything required for stocking a grocery store. The house of Charles H. Billings, who was arrested for connection with the robberies, was also searched yesterday and a load of property similar to that found at the house of Learned was found.

# FOR INVENTIONS.

Equal with the interest of ti ose having claims against the government is that of INVENTORS, who often lose the benefit of valuable inventions because of the incompetency or inattention of the attorneys employed to obtain patents. Too much care cannot be exercised in employing competent and able solicitors to procure patents, for the value of a patent depends greatly, if not entirely, upon the care and skill of the attorney.

With the view of protecting inventors from worthless or careless attorneys and of seeing that inventions are well protected by valid patents, we have retained counsel expert in patent practice, and therefore are prepared to Obtain Patents in the United States and all Foreign Countries, Conduct In-

terferences, Make Special Examinations, Prosecute Rejected Cases, Register Trade-Marks and Copyrights, Render Opinions as to Scope and Validity of Patents, Prosecute and Defend Infringement Suits, Etc., Etc.

If you have an invention on hand send a sketch or photograph thereof, to gether with a brief description of the important features, and you will be at our advised as to the best course to pursue. Models are seldom necessary others are infringing on your rights, or if you are charged with infringements boulevard are dissatisfied with the amount others, submit the matter to us for a reliable OPINION before acting on the

The fire spread from the Tabernacle to this hotel, and then to the dwelling house on Greene avenue and Waverly avenue opposite the church. The wind carried the blazing cinders in such quantities in a southeasterly direction that dwelling houses on Washington avenue, two squares away, and also the Summerfield Methodist church, were set on fire by them; but the greatest loss on any one o these structures did not exceed \$15,000. The total loss, however, reaches over \$1,

the fire. He said: "At the close of the church service, I was standing at the foot of the pulpit shaking hands with hundreds of people from all lands. I was about through and walked toward the center of the church, where my wife stood, when she called my attention to fire springing out from the top of the organ. I saw at once that it was under full headway, and my first impulse was to look around and see how many people were then in the house. As there were only about 20 people and 25 doors to get out through, I felt that

they would all escape. "I went into my study back of the plat-form, passing under the blazing piping, to get my hat and coat. While in a sort of study a friend rushed into the room and said: 'Get out of this room immediately or you'll not get out at all.' We went out into the church, one-half of the organ was down and the fire had leaped to the roof. I saw that nothing could

save the building and I came out. adjoining rooms were packed with people and the panic would have left the whole scene one of indescribable horror. Or, if it had occurred two or three hours later, when the Sunday school was in session there would have been a thousand house holds bereft in Brooklyn. Personally, feel not the least bit of disheartenment nor less faith in God, nor less of hope for

the future. "Our church has been burned three times, and it has always occurred on Sunday. It is a mystery that I adjourn till the next world let us know."

When asked for his own opinion as to the cause of the fire, he said emphatically: "Electric lights; electricity caused this fire as it did that of the last tabernacle on Schemerhorn street.

Continuing, Dr. Talmage said: "The fire may change my entire program, and I do not think I will start on my trip around the world as I intended tomorrow

The Tabernacle has a membership o over 4000 on the pastor's books, but the congregation is only bounded by the ca pacity of the building. In the Sunday school there are 1200 scholars registered, the attendance varying with circum-stances and seasons from 700 to 1800, and when in session the children are controlled by just 100 officers and teachers. Work Was Swift,

The fire was the most destructive, rapid and furious that has visited this city for years. It started shortly after noon, when fortunately nearly all of the 7000 morning worshippers at the Tabernacle had de-parted, and at a time when the guests of the big hotel were somewhat prepared for such an emergency. It spread with light-ning-like rapidity, and before sunset had destroyed property to the value of nearly

West Quincy to Big Blue Through the Reservation.

A PLEASANT OUTING FOR A DAY.

But One Should Prepare for a Rough and Tumble to Enjoy It.

The Boston Transcript of Saturday published the following relative to the Blue Quincy will this year contribute more to Hill's Reservation which is of special interest to Quincy people, who now have a new route to Blue Hill:

> Unfortunately the very renown of the Blue Hill belittles our latest park to which t gives its name. The Great Blue with its vantage of a hundred feet height beyond its nearest rival and a meterological observatory, has monopolized the notoriety of this wonderful range. But though it be the kingpin and godfather of the district it cuts but a small figure in the extent of the new public domain. Even to describe the reservation as lying around its base is to create a false impression. There are nearly 5000 acres to which everybody has equal and unequivocal rights, and to which the Great Blue only makes as it were a decorative knob, finishing it architecturally. A day is easily spent within its confines, and one may flatter himself on being somewhat of a woodsman if he makes the journey between its limits without many retracings of his way, and can maintain within his head a "working" recognition of the various elevations which to a novice seem to be given to migratory habits. No fear but there will always be occasion for woodcraft in this district, though the pathmaker is already at work smoothing the way for heel and wheel and reclaiming trails, which look as though they had been formed by a plough turning out a petrified furrow from a field of solid rock.

> Yet to appreciate in any way the beauties of the district one has to have a liking for The Rough and Tumble

and come prepared accordingly. Entrance is a matter for some consideration. There must be some bargaining with the country cabby or a sturdy trudge to get where the R emarkable Quality white posters greet one on the trees as flags of truce in the war against intruders. O pen hand Dealings to approach, for it is a region so rugged as Price the Lowest to deter not merely the railroads but even salvation, has kept it in its natural state and its values where it was possible to purchase it in its entirety. As the Great Blue has the widest fame, the most popular | HOLDS CUSTOM approach is through Readville, though its station is fully two miles distant, but by a picturesque and well-conditioned route with such alternating attractions as the Neponset and its meadows, the great The golden wedding of Mr. and Mrs. estates on the side hills of Milton, and the Jones Howe was celebrated at the Wollas- constantly widening view prophetic of the ton Baptist church on Saturday evening endless sweep of country which will come by a surprise party. Mr. Suckling presided and there was orchestra music and speaking. About forty were present. Rev. Calvin Cutler of Auburndale who

preached very acceptably at the Congregational church on Sunday in exchange with Rev. Mr. Norton, is held in high regard by the Auburndale parish. He recently tendered his resignation, but the church unanimously asked him to remain another year, and it was Rev. Mr. Norton's pleasant duty to tell his people that he accepted the vote of the church and would remain.

of Westfield, N. J., author of "New Thera peutical Agents", the standard text book of the newer materia medica, Consulting Chemist and Therapeutist, one of the most widely known men among the medical profession gives it his highest endorsement, as testified by the following voluntary statement: "Allen's Sarsaparilla commends itself to me thera-

peutically, chemically and clinically. Its therapeutical power, physilogical activity, and chemical purity, are all noteworthy; and the reason is to be found in the fact that it is true to its name, or honest, as the word goes. That is, it is vegetable alterative, and tonic. Perhaps the highest praise that may be given it is that its action represents that of mercury, less the faults of that drug; for, has not Pereira said, "A perfect mercury would be a perfect alterative."

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of gov-ernment to deter him from quickly conceivernment to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obof the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. # REPUBLICAN CAUCUS

Will Shape the Course of the Tariff Debate This Week.

THE RECENT BANK SCRIP ISSUE.

Effort to Be Made to Relieve It From Taxation.

WASHINGTON, May 14.-The course of the proceedings in the senate this week will probably depend largely upon the result of the Republican caucus to be held

The Democrats are hopeful that the caucus will decide upon treating the tariff in what they consider "A business like manner," and letting the bill proceed upon its course without as much speech making and without the effort at delay which the Democrats claim have been dis played by some of the Republican sena

tors so far on the debate.

There is unquestionably a large element on the Republican side of the chamber opposed to any course which smacks in the least of filibustering. This element includes a large number of senators from the west, and also a sprinkling of the older eastern senators, who feel that they have a record to maintain against dilatory

The younger New England Republica senators are, however, a unit in favor of continuing the fight upon the lines which have been pursued up to this time. They contend that no dilatory tactics have ve been resorted to, and that none are neces sary, and they will probably make a strong plea in caucus to continue the pro gram heretofore pursued in discussing

If the conservative element in the R publican ranks win the caucus, the pres entagreement as to the hours for deb will probably be observed; if the opposite party carries the day, the Democrats wil most likely renew the effort to extend the hours and to force the fighting.

In the House. Appropriation bills will continue t have the attention of the house of repre sentatives during the week, unless th to have the Brawley bill taken up o Wednesday.

Chairman Springer of the banking mmittee had hoped to take up this lon deferred bill, which relieves from tax; tion certain bank scrip issued during th currency stringency last fall. VEGETATION IN GOOD GROWTH.

Valley Lands More Favored Than High Ground.

Boston, May 15 .- The New England weather service. United States weather bureau, issues the following weather-crop bulletin for the week ending May 14, 1894: The weather for New England for the week just passed has been very favorable for work, except where the ground was too dry to put in seed, and vegetation has made good growth on all wet lands. On land at all dry the drought is seriously telt, especially in the southern states. In eastern Maine nearly half an inch of rain fell in the last few days of last week, so nothing is suffering, although the fall this week has been only a trace. Some of the amounts given in different

sections are as follows in inches and hundredths: Portland, Me., 0.11; Newton, N. H., T.; Milford, N. H., 0.08; Northfield, Vt., 0.07, Winchendon, Mass., 0.15; Leo-minster, Mass., 0.05; Boston, T.; Nantucket, Mass., 0.02; Kingston and Block Island, R. I., 0; New London and Greenfield Hill, Conn., 0.06.

High, disagreeable winds prevailed for a number of days, which served to dry the ground very rapidly and to fill the air with dust. The high wind of the 11th blew down considerable fence in central Maine, and caused much damage to asparagus in eastern Massachusetts. The correspondent at Concord, Mass., reports that some growers have lost over \$200 by

The days were generally warm, but the nights have been cool, with frosts on the 10th, 11th, 12th and 14th in different sections. At Eastport, Me., the temperature No damage to crops by the cold weather

has been reported from Maine. Grass prospects are flattering. Early grain is up in central counties and is looking well. In southern Penobscot county more grain is being sown than for some years. The weather was dry and cool in Vermont, but favorable for all farm opera-tions. No damage has been reported from the frosts, although there are some fears for the plums. Early potatoes are mostly planted in the vicinity of North field and in the northeastern part of the state. About the usual amount of grain has been put in in the latter district.

and while on the low lands crops made good growth, on dry ground in the eastern part of the state and in the upper Connecticut valley correspondents report vegetation almost at a standstill. Considerable damage has been reported from the eastern part of the state by the frost of the 11th. At Concord asparagus, grapes beans, strawberries, sweet corn and pota toes all suffered. Strawberries suffered generally to a more or less extent, and fruit slightly. Near the coast the modifying influence of the water prevented damage, and in the large river valleys a dense fog prevailed.

We quote the following authorities relative to the probable damage to the cranberry crop: Hyannis: "No damage to cranberries in this section, C. H. Sleeper." South Dennis: "No damage noticed or heard of, part of the bogs still under water, Felderhof." Yarmouthport: "I have not seen or heard of any damage that frost has done to cranberries in this part of the town, D. B. Crocker." Plymouth: "I find that the cranberry bogs that have been kept under water until the middle of April or first of May were not injured by the frosts last week. On bogs where there was no water, or where it was let off early, and the buds started in March, there may have been some damage, but I cannot hear surely of any, L. B. Knapp." West Barnstable: "Frosts have damaged cranberry blossoms and buds, during the past week, on bogs where winter flowage has been off for 10 days or longer. It is not easy to estimate the damage at this time, but it is probably not extensive in this county (Barn stable), A. D. Makepeace."

Rhode Island. In Rhode Island a white frost was noted in low lands on the morning of the 11th, but no damage has been reported. Apple trees are blossoming very full. Weather was favorable for farm work, and it is being rapidly pushed. The ground is very

It is very dry in Connecticut and crops It is very dry in Connecticut and crops are suffering for rain, except along the immediate coast. Quincy for Mayor.

The Democratic plan in Boston, says the Advertiser of that city, is fairly well mapped out, the most important feature being that Mr. Josiah Quincy will be the nominee for mayor if he so desires. That he does so desire is the common talk. Last year he was to have been put in the field, but Mayor Matthews decided that he would like to run again. This year he may côme to a similar position, but the Democratic politicians do not think so, and are laying all their plans upon his announced declaration. In that event Mr. Quincy will have

QUINCY DAILY LEDGER, TUESDAY, MAY 15, 1894.

Many Matters Consided at the Monthly Deputy Marskals Are Chasing "Indus Meeting Last Evening.

The regular monthly meeting of the Squantum Yacht Club was held Monday evening at the club house, Norfolk Downs, Vice-Commodore Flood in the chair.

The committee on float reported that nothing definite had been done as yet. Two applications for membership were

received and applicants elected. This makes 30 new members since the annual The regatta committee reported that

there was an urgent necessity of marking the rocks in the club course with buoys or that they be blasted out, and the sum of \$25 was appropriated to be placed in the grove known as Little Spa, just outside hands of the board of directors, to be used by them at their discretion in removing the

The matter of championship cups was brought up and discussed at length.

The report of the treasurer showed good cash balance on hand, and the club to be in a good financial condition. The speechmaking by Coxey in the streets of treasurer also reported quite a sum from the sale of bonds for the purchase of land and the erection of a new club house.

> Last year the reporters experienced considerable difficulty in obtaining the summary of races. This year, however, they will have no difficulty as the judges have been instructed by vote of the club to return to the club house immediately after the races and remain there half an hour to eceive any protest that may be entered.

The piazza on the water front of the club nouse is nearly completed and will be in readiness for the opening race June 18.

### May Magazines.

Stone for May continues its "Talks on Quarrying" and "Problems in Stone Cutting" and has illustrated articles on "Geology of Building Stones," "Vermont's Great Marble Producers " and other subjects, and many matters of interest to the craft.

One of the brightest educators in the country contributes to the magazine Education for May under the title, "The Critic at Sea," the first of a series of articles in criticism of Dr. Rice's strictures on American teachers and American schools. These articles will be very widely read and teachers generally will rejoice that so able a champion has picked up the gauntlet.

Babyland for May (The Babies' Own Magazine) opens with a frontispiece of a boy and a dog and a hand-organ, and the story that comes after tells all about what they did May Day. The babies will like hour still stand gaping, with their finit. They will like the verses that follow ; they will like the pictures, too, and the

other stories and verses. Our Little Men and Women, for May, comes to us a harbinger of the month. Its publishers seem to have the knack of obtaining the daintiest and cleverest and oddest bits and brightest conceits going. "The Little Lame Pig" and "The Little Red Man" verify this; so do Mrs. Archibald's pretty Arbor Day Story, which comes in "A Dozen Good Times."

Col. F. W. Parker has an outline of "Language" and "Manual Training" in Primary Education for May. Three pages are devoted to Memorial day, and there are many departments of interest t educators and parents.

# PATENTS

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of dovernment does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing de-ficiences, does not permit the affairs of gov-ernment to deter him from quickly conceiv-ing the remedy to overcome existing dis-crepancies. Too great care cannot be exer-cised in choosing a competent and skilful attorney to prepare and prosecute an appli-cation for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice appli-cable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. C., representing a large number of important daily and weekly papers, as well as general periodicals of the country, was instituted to protect its patrons from the unsafe methods heretofore employed in this line of business. The said Company is prepared to take charge of all patent business entrusted to it for reasonable patent business entrusted to it for reasonable fees, and prepares and prosecutes applications generally, including mechanical inventions, design patents, trade marks, labels, copyrights, interferences, infringements, validity reports, and gives especial attention to rejected cases. It is also prepared to enter into competition with any firm in securing foreign patents.

GOOD AND BAD BLOOD.

The Weak Point in the Spring.

MEDICINE THEORY.

We are told that the source of three fourths of our diseases is in our blood; that a good purgative three or four times a year will keep us in good health. Is this so or isn't it? It may be all right for strong, fat people: people whose blood is too rich. For thin people it certainly is not good. Dys-

peptics, consumptives, pale, thin, anamic people suffer from poor blood, a scarcity of red corpuscles. No purgative, or so-called blood medicine can help them.

"The blood is the life;" yes, but what makes the blood? Food. Good food is all that is needed to make poor blood rich.

# PATENTS

FOR INVENTIONS.

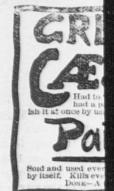

Equal with the interest of the self-action against the government is that of INVENTORS, who often lose the benefit of valuable inventions because of the incompetency or inattention of the attorneys employed to obtain their patents. Too much care cannot be exercised in employing competent and reliable solicitors to procure patents, for the value of action the cared greatly, if not able solicitors to procure patents, for the value of a patent depends greatly, if not entirely, upon the care and skill of the attorney.

With the view of protecting inventors from worthless or careless attorneys and of seeing that inventions are well protected by valid patents, we have retained counsel expert in patent practice, and therefore are prepared to Obtain Patents in the United States and all Foreign Countries, Conduct Interferences, Make Special Examinations, Prosecute Rejected Cases, Register Trade-Marks and Copyrights, Render Opinions as to

Scope and Validity of Patents, Prosecute and Defend Infringement Suits, Etc., Etc. If you have an invention on hand send a sketch or photograph thereof, to ether with a brief description of the important features, and you will be at once advised as to the best course to pursue. Models are seldom necessary. If others are infringing on your rights, or if you are charged with infringement by others, submit the matter to us for a reliable OPINION before acting on the

rain has fallen for a long time, and as it was several minutes before the streams were in effective shape, there was a roar and nothing was left but ashes, as the flames swept on through the rafters of the walls and smoldering ruins met the up. No trace could be had of the two structure. The left-field bleachers were gaze.

Meanwhile the sparks had fallen upon the house across Berlin street, a narrow thoroughfare which bounds the baseball grounds. These buildings were all of wood, and they burned as freely as those within the enclosure.

The wind, which seemed to have in creased, drove the fire directly into the heart of these buildings, and it rushed on toward Tremont street, reaching out to the right and left until the entire square between the ball grounds and Tremont street, and extending north from Wal-pole street, was burning flercely. The choolhouse, which stood at the corner of Walpole and Tremont streets, a brick structure, checked the progress of the fire only for a moment, and that, too, was numbered among those consumed.

At 5 o'clock the entire block along the west side of Tremont street, from Walpole to Burke, was a brilliant mass of flames, which swept across to the opposite side and soon engulfed the buildings along the east side for four blocks. The tons of water that had been poured into the buildings from every side apparently had not the slightest effect, and the By this time the residents of the ten

So rapidly did the fire eat its way, however, that those in the blocks adjoining Tremont street in the burning district did not have time to save their household effects, and barely escaped with their lives.

Frightful Scenes. The streets were filled with frightened women and children, poor people who

were trying to save a part of their small property, and hurrying firemen and po-licemen. Furniture of all kinds littered the sidewalks, and the firemen were

This boy was christened Francis A. Spear, at present one of the most widely known court officers in Norfolk county, the east district of which he presides over as probation officer.

Frank, as he is familiarly known, did not think it proper that the occasion of his birthday should pass unnoticed, and announced that he would receive his friends at his residence on Thayer street, in the house in which he was born and has always lived, from 4 o'clock, P. M, to-, Tuesday, May 15.

The invitation was a general one, and as a result many of his friends called to pay their respects. Frank was found as happy and smiling as usual, and was kept busy for some little time in extending the right hand of fellowship to one and all.

During the early part of the evening Representative John Kelley of Braintree, called order and in a few appropriate remarks presented the host with a willow rocker, as a slight mark of the appreciation by which he was held by the party assembled. For once in his life Frank was surprised and at loss for words, and could only stammer out his words of thanks.

From then on until midnight the hours were passed in social enjoyment and as it was a strictly gander party, smoking was quarter before eight. allowed, and it is unnecessary to add that there is not much danger of the house being infected with moths for some little time.

In the dining room refreshments were served during the entire evening, the host being assisted in receiving and entertaining by his brothers three.

It is worthy of note that Mr. Spear celebrated his 21st birthday nineteen years ago by a similar gathering, and among those the department to cope with much of a fire in the right field on the Boston base ball present on the occasion were John S. Gay, George Nash and George W. Flint, and they were also present Tuesday evening to extend congratulations and promised to be present at the celebration upon the The ordinance establishing the Fire and Cabot street and between Burke street passing of the half century mark ten years hence.

Those present on this occasion were: Chief of Police Joseph W. Hayden, City Clerk Harrison A. Keith, Officer Thomas F. Ferguson, George W. Jones,

Arthur W. Wentworth Elbridge Porter, George N. Nash, John S. Gay, Benjamin J. Weeks. Henry O. Studley, Charles A. Feltis, Eugene O'Connor,

John T. Cavanagh, Joseph T. French, Gordon McKenzie, C. F. Pettingill, Albert Keating, Robert Williams.

During the morning hour a few bills were acted upon, and then the tariff was taken up. Mr. Voorhees introduced a resolution regarding the amount of revenue to be raised under the Jones bill, and it was this which caused the only exciting incident of the day and brought forth the remark of Mr. Vest above referred to. He claimed that the Republicans were filibustering, but Mr. Aldrich declared that it was not the intention of his side to resort to such methods, but that they would consider the bill and debate it in a fair and proper manner. THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and

Four Harvard Students Meet Death in

Boston Harbor. Boston, May 16.-Edwin Stanton Bach of New York city, William Campbell Trusdell of Newark, N. J., John Farnum Browne of Philadelphia and Franklin Whitall of Philadelphia, all students at Harvard college, were drowned in the up-per harbor, near Thompson's island, Sunday afternoon. The bodies of Browne and Bach have been recovered.

An investigation quickly confirmed the misgivings raised by the story of Boatkeeper Hutchins at City Point. He said that late Sunday atternoon he let a catboat to four young men, who told him they were to be gone but a few hours. He saw them beating about the bay for some time, and two hours later he noticed them in the path of a squall that was then sweeping along the bay. When the blow had passed he saw them no more, but thought nothing of it at the time, as it was rather dark. When the boat was not returned he went out on a search, but saw nothing to indicate that his property had been wrecked.

Boatman Hutchins sent out a searching party yesterday afternoon, and after beating about the harbor for a number of hours the party sighted an upturned boat. When it had been partly righted two bodies, those of Browne and Bach, were found clinging to the mast. Each was locked in the arms of the other, and both had to be lifted into the smaller boat to gether. The men had partially disrobed. The bodies were turned over to the harbor police, and the searching party con-tined to look for the bodies of Trusdell and Whitall, but they have not yet been

from fully 50,000 tons of coal consumed in the disastrous fire on the river front yesterday afternoon. A conservative estimate places the losses at \$500,000. The fire from a spark wafted from a plumber's kettle to the barn of the Newell Coal and Lumber company, whose entire property is in ashes.

With lightning like rapidity the flames

unicated with the coal and lumber gards of Olney & Payne Bros., and their stock and structures were wholly con-sumed. The flames next darted across the river, enveloping in their fold the coal and lumber yards of the J. T. Cot-trell company and the City Coal company, which were heavily stocked and are also heavy losers.

The flames were fanned by a strong wind from the northwest, keeping the blaze along the river front, else the de struction of tenement houses in the vicinity would have been something appalling As it was three were destroyed, and the tenants barely saved their effects. The buildings were occupied by John McNally and familly, Mrs. Mary McCann and family, Mrs. McFadden and family and Mrs. Moore. A two-story dwelling on the west side of Lumber street was also de-

Carleton was a new man on the paper, a little green in the business, but with a "nose for news" and a sense of honor and the eternal fitness of things, coupled with reliability of statement. Mr. Howard had looked over his staff that night before giving the assignment. "Get to that wreck, Carleton," he said testily. "You are the only man here who can write it up without having the waves roll mountain high." And the new reporter had torn a thick section from the block of copy paper and

The storm, which had been raging for three days and had finally caused the disaster, had subsided a trifle, and from his distance the great, black hulk seemed resting easily upon the waves. On account of the hour there were but few spectators -only the hurrying life saving crews, the patrolmen and the inevitable groups of ragged wharf rats. Dummies In the Band. Quartermaster Liebich of the Fifth regiment made a discovery once and has been careful ever since whenever he has occasion to engage a band to play martial music for the gallant boys in blue. "I wanted to engage a brass band,

said he, "and there was a certain rivalry among the boys that made it difficult to reach a conclusion. I finally made up my mind and engaged a certain band, and the next day the bandmaster of the rival organization said to me, "You watch your band tomorrow and see that they don't ring in any dummies on tain bands collect so much per man from the people that engage them they frequently ring in people in the band that don't know a bar of music from a bar of soap. They just simply walk along with the rest of the players and nobody is any the wiser. The next day the parade took place, and I followed the advice of the other leader and watched my band carefully. It didn't take long to pick out the two dummies. They just strolled along with the brass instruments at their mouths and acted as though they played without inflating

their cheeks. We had to pay for those fellows \$3 apiece just the same." "And what did you do?" "I asked the leader to tell the two

dummies to play solos." "And they did?" "Not by a jugful. He simply said that that wasn't in the contract, and he refused to do it. I have had my eyes opened since, and you may rest assured they don't ring in any more 50 cent dummies on me and charge me \$3 for them. "-Cleveland World.

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing de-ficiences, does not permit the affairs of gov-ernment to deter him from quickly conceiv-ing the remedy to overcome existing dis-crepancies. # EMMETT'S ASSERTION

Has Stirred Up Independent Church Parliamentarians.

IT IS REPUDIATED AS FALSE

And Furnishing Argument Against Home Rule.

NEW YORK, May 17.-The independent church parliamentary party of America met last night at their headquarters in this city. About 200 were present, and they were in a state of excitement and indignation. The cause of their anger was a statement which Dr. Thomas Emmett, president of the Irish National Federation, published a few days ago regarding Lord Salisbury's assertion that if shome rule were granted the Ulster Orangemen would be given to slavery in order to please the triangle in Chicago or Tammany in New York.

The portion of Dr. Emmett's statemen which aroused the ire of John E. Red-mond's followers was its conclusion, which ran thus: "Throwing aside all sentiment, and simply looking to the best good of Ireland in connection with circumstances existing today, and over which she is powerless to exert any con-trol, I sincerely believe that her condition is best as a part of the British empire; far preferrable indeed to the acceptance of her independence in her present cir

of her independence in her present dr cumstances, even if it were freely ten-dered by England."

President O'Flaherty read the forego-ing extract. It was greeted with cries of "Shame" and repeated hissing. "This statement," said Mr. O'Flaherty, "is the most anti-Irish and reprehensible I have ever known to come from any man professing to sympathize with the cause of Irish nationality. I repudiate Dr. Emmett's utterances as false and unjustifiable and call for your expression of opin-ion. No measure of home rule which does not get rid of British misrule can benefit Ireland, and we shall never accept any measure which does not grant

Ireland independence." Michael Breslin said that as president of the National Federation Dr. Emmett's words might have some weight. The speaker condemned the doctor's utter-ances, and except for the honored name of Emmett, which he bore, the speaker would have passed the statement over with scorn. The doctor's

He is merely the mouthpiece of Justin McCarthy, Lord Rosebery and the English Whigs and the Marquis of Londonderry, the modern Castlereagh, who will hail his statements as a plea for a denial for such self-government. It is a piece of rampant Whiggery.

James S. Rice proposed this resolu

"That we denounce as un-Irish and unnational the statement made by Dr. Emmett, president of the Irlen Federation of America, that the condition of Ireland 'is best as a part of the British empire; far preferrable indeed to the accepting of her independence in her present state, even if it were freely tendered by England.'

"That we repudiate Dr. Emmett's tion, and we feel we only express the ser timent of Irishmen the world over, and characterize his utterances as the emanation of the English and Irish Whis alliance, which has of late so demoralized our people, and has disgraced the cause o Irish nationality the world over."

Tariff Will Lead to a Siege of Night Sessions and Rollcalls.

DRAWN BATTLE IN THE SENATE Lighting Plants-The Official Ballot-No

After a Wearisome Session of Eleven Hours and a Half.

WASHINGTON, May 18.-Interest in the tariff debate in the senate was overshadowed yesterday by the debate on the Ledge resolution to investigate the charges of attempted senatorial bribery and the charges that the sugar schedule of the tariff bill had been fixed in the interest of the Sugar trust in return for a \$500,000 contribution alleged to have been made by the trust to the Democratic campaign fund.

Se lators Cockrell, Hoar, Chandler, Faulkner and Vilas offered amendments, Sugar trust, directly or indirectly, to campaign committees, or used in elections by

"Or whether any senator has been speculating in what is known as sugar stock while the tariff bill has been pending." The resolution, with amendments enlarging its scope, was adopted.

Coercive Measures, From 12 o'clock until 4:30 the tariff debate dragged along, Mr. Gallinger holding the floor for two hours and Mr. Higgins for 2 1-2 hours. Then after an hour afternoon shall be a legal half holiday and a half's work, during which time and that notes falling due on a holiday or only 15 more paragraphs of the chemical | Sunday shall be payable the following schedule, comprising two pages of the bill, were disposed of, the Democrats concluded to change their tactics.

The Republicans, under the leadership of Mr. Manderson, resisted vainly, pro-

testing that they did not seek to delay action on the tariff bill. They used usual March they left New York for a trip filibustering methods, breaking a quorum by refusing to vote, although certain of their western colleagues declined to join

in the filibuster. Mr. Manderson moved to adjourn. The

motion was lost, 12 to 30. At about 6:45 the lights were turned on and shed a blaze of effulgency upon the re-election. chamber. The senators sat listlessly in their seats reading the evening papers or chatting in groups.

At 7:30 p. m. Mr. Aldrich inquired of Mr. Faulkner, then in the chair, if the sergeant-at-arms had yet made a report. Upon receiving a negative response the Rhode Island senator moved an adjourn-

"Upon which I demand the yeas and nays," said Mr. Harris, emphatically. The motion was defeated-yeas, 11 nays, 29; three less than a quorum.

No Yielding. Both sides by this time had evidently concluded to "sit it out." They prepared for a siege. They smoke in the cloak-rooms and chatted on the floor. The scene recalled the long struggle on the

silver bill last summer. Mr. Pugh (Dem., Ala.) and Mr. Squire (Rep., Wash.) made their appearance about 7:30, and were the first fruits of the

sergeant-at-arms' prowess.

About 8 o'clock Mr. Chandler disturbed the sanctity of things by inquiring whether he could proceed with some remarks he desired to make on the pend-

Mr. Faulkner, in the chair, ruled that no remarks were in order pending the ab-

sence of a quorum. At 8:20 Sergeant-at-Arms Bright submitted his report, which showed that of the absentees on the rollcall 10 senators were absent from the city, 22 could not be found, one, Mr. Morrill (Rep.), had declined to attend, and 19 were either present now or had reported that they would immediately respond to the request.

This did not satisfy Mr. Harris. He was in favor of adopting more heroic measures. He moved to compel the attendance of the absentees.

Adjournment at Last. At 10:30, after sitting for 11 1-2 hours, and after some very sharp and plain talk on both sides, the Republicans succeeded in forcing an adjournment, although the battle was in reality a drawn one. A com-promise had been practically agreed upon before adjournment, by which the sessions of the senate are to begin at 10

o'clock after Monday. Senators on both sides of the chamber regard the work of last evening as the real beginning of the siege of night sessions and rollcalls, a test of physical endurance on one side and of resistance on the other, which all have understood from the beginning would be resorted to before the end of the tariff debate should

# NOT INCENDIARY.

Bestar's South End Fire Was Entirely Due to Carelessness.

Boston, May 18 .- Fire Marshal Flynn is satisfied beyond doubt that the South End fire was not incendiary work, but the result of carelessness.

The person that beyond any reasonable doubt establishes this fact is the boy whom Colonel Billings said told him that the fire had been set. The lad's name is James Laskey; he is 14 years of age. His story was a straight

one, and satisfied Marshal Flynn that he was telling the truth, and that he was the one to fully explain the origin of the blaze that developed into such a conflagration. Jimmy said he had "sneaked" into the grounds and was watching the game from beneath the bleachers when he saw a man above him light a cigar and carelessly drop the lighted match to a stringer below. The boy further says that he no tified a policeman, who placed a ladder against the fence and watched the blaze for some time before making any effort to have it extinguished.

Organized labor is coming to the fore in the general plans for the relief of the sufferers from the conflagration of Tuesday. The local cigarmakers' union sent out subscription lists last night to be placed in all the cigar factories of the district, and a large sum will doubtless The City Council will meet Monday be raised from this source.

### FIGHT STILL ON.

Mine Workers and Operators Fail to Reach a Settlement;

CLEVELAND, May 18. - At yesterday afternoon's session of the miners' convention President McBride of the Miners' union asked the operators and spectators to retire in order that the miners might hold a conference. This was done, and a meeting lasting an hour was held.

At its conclusion President McBride offered a resolution reciting that whereas a large number of operators who had refused to attend the conference had refused the hand of peace which had been ex-tended to them, the miners believed that any settlement arrived at in the absence of those operators would only add to and accentuate the miserable condition of the miners, and that it was impossible to make any settlement with the operators who had met them here.

While appreciating the efforts of the operators who had attended the conference to reach a settlement, the miners The new opening at the Quincy post asked their co-operation in bringing office for papers will be appreciated. Sallie Palmer, of Nicetown, Pa., gives the reason for this sad condition of many working girls.

Sometimes their back and sides will ache terribly. They are faint and dizzy with pain and weight in the lower part of their stomach. They watch the clock, and wish that the day would end, as they feel so ill and tired.

Standing all day, week in and week out. they have slowly drifted into woman's great enemy, displacement of the womb. That, or some other derangement of the organ, causes irregularity or suspension of the "monthly periods," bloating, flooding, or nervous prostration.

The continued case of Victionio Aja for The continued case of Victionio Aja for assault upon Thomas F. Dooley with a dangerous weapon, came up on continuance. The defendant was represented by counsel and the plaintiff was the first witness to be examined. He was very weak and could hardly speak aloud. He testified that he took a block of wood from near the defendant which was not in use, and shortly after Aja came over and demanded it. Upon being refused Aja struck him on the head.

The Academy nine went to Milton Thursday afternoon and defeated the Milton Academy boys in a close and interesting game. The Milton team is much stronger this year than it has ever been before. This in part accounts for the narrow margin by which the victory was won. But on the Milton grounds the pitcher's box is only fifty feet from the home plate, instead of sixty as the rules of this year require. THE VALUE OF RICH MEN. Astract From an Address by Richard

H. Dana, In Boston, Feb. 23, 1894. When in Chicago at the World's fair When in Chicago at the World's fair pleasure. Thoroughly practical, and you probably saw in the fine art gallery a guaranteed to give perfect satisfaction or carried by C. W. Guy and W. G. Shaw at signature of Eisner & Mendelson Co., Sole | very striking statue of a group of persons | money refunded. Henry L. Kincaide & the Quincy Coliseum. Agents for the U.S., 152 & 154 Franklin St., struggling for labor \*ickets. As you know, there have been times in certain parts of England when labor has been very scarce, and what little employment there was used to be distributed by scattering labor tickets among the people. This statue represented such a scene as often took place. One large, strong man has grasped the ticket and holds it aloft in his hand, a stalwart young man is trying to take it from him. An old man lings piteously to his waist, but all the while the eyes of the fortunate holder are looking at a poor woman with her child at his feet, and he is struggling between his own desire for work and his pity for those more helpless than himself.

Now what does all this mean? It means a scarcity of wealth in that town. Now let us suppose that there should come into that town to stay 100 men with incomes of \$15,000 apiece, let us say ewners of a rich copper mine in the west. What would be the result? They would build homes. That would create a demand for lumber, bricks, stone, lime, cement, hardware and labor. Then the lumber and hardware dealers would have money, the brick yards would start up and with the joint employment of labor there would be a demand for all sorts of articles.

The storekeepers would have more money, rents would be paid, real estate would advance, and again there would be more demand for goods, and that would be a demand for more labor and that in its turn create demand for goods and so on. Not only the townspeople, but the farmers would be benefitted. The demand for farm products would not stop with what the 100 rich men and their families would consume, but storekeepers, mechanics and laborers who before could not afford the pittance to keep life in their bodies would now be purchasers of milk, butter, eggs, meat and

Now, would it have been a wise policy to have kept these 100 rich men from coming into that town by insisting on imposing an unjust double tax on their property which other countries did not insist

I heard on the floor of the legislature last year a member who got up and denounced rich men generally and said. "We don't want any more millionaires in the commonwealth." What is the use of talking that way. It isn't that we want the individual millionaires or that they are any more agreeable than equally well educated, honest and able men who are poor, but we do need their wealth, and yet we insist on a double tax in this state such as none of our surround-This square is lifelike-it would be blank ing states require, and which tends to if it weren't for nice clothing. And if you keep out and drive out wealth from this come to us you will be sure to get not only a state, and efforts are being made at the state house to enforce that unjust double tax more stringently than ever.

INJUNCTION IGNORED.

Railroad Company Laid Tracks and Small Riot Ensued.

MILLVILLE, N. J., May 18.-The South Jersey railroad yesterday succeeded in laying its tracks at the Woodbine crossing. It effected this move by crossing the tracks of its rival, the West Jersey road, notwithstanding the injunction issued by the supreme court. At midnight the South Jersey company

brought a big gang of laborers down to the crossing. The West Jersey watch-man, who slept in the security of the injunction, was seized, bound and gagged, and the crossing quickly effected. Supervisor-in-Chief Chenowith of the West Jersey road ordered his men to tear up the South Jersey's tracks when he ar rived at the spot. The gangs of the rival roads were lined.

Words followed, and then blows, and That's what they all say who trade then all hands pitched in with spades and The battle waged was fierce and de termined, the South Jersey men being meat for the same money than you can finally routed and put to flight. Eleven jured, among them Superintendent Lutz of the South Jersey road.

Justice Cheeseman and a force of deputy sheriffs arrived on the scene later, armed with warrants for the arrest of the South Jersey officials for provoking a riot and disobeying the mandates of the courts. Supervisors Stubbs and Chenowith were arrested, but the others made their escape on the train which brought them. The justice held court in a freight car and held both prisoners in \$500 bail, which was furnished.

Hines For Governor.

ATLANTA, May 18.—The Populists put out a state ticket with James K. Hines for governor. The platform endorses the principles of government promulgated and expounded by Thomas Jefferson, who, at the beginning of our political history, combatted the schemes of the eastern money power (as outlined by Alexander Hamilton), and who predicted the ruin which would fall upon this country when concentrated wealth should dictate its legislation. # NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and ventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength imminent risk, as the breadth and strength of the patent is never considered in view of a of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. Republicans Not Anxious to Rush the Tariff Bill Through.

AN INTERESTING HOUSE SESSION

Members Talk Upon Many Important Subjects.

WASHINGTON, May 19.-The temper of the senate yesterday was like a May morning after the prolonged and somewha stormy session of Thursday.

The house bill authorizing the secretary of the treasury to take steps to locate the northeast boundary line of the Pamaquid light station, Maine, was passed. The resolution calling on the attorney genera for information as to the existence of a sugar trust in violation of the anti-trust law, and whether that law is defective

was also adopted.

The resolution offered at the close of the long struggle Thurs lay night providing that the senate should meet at 10 o'clock instead of 11, beginning next Monday, was laid before the senate by the vice president. Not a word was said on either side of the chamber, and the vice president declared the question to be on the adoption of the resolution. Silence being the only response, he declared the resolu tion adopted.

Sherman Starts It, Mr. Sherman immediately protested that he had not understood the question and manifested a disposition to debate the resolution, but being informed by Mr. Hale that there was a tacit understand ing that the resolution should be acted upon he said he did not care to violate any agreement.

After some discussion on this point, Mr. Frye got the floor. He explained that his absence during the struggle Thursday was due to an assurance he had received that no important move would be made. He regretted his absence be cause he was fond of a contest. "I have always had but one opinion with regard to the tariff bill," he went on, defining his position in emphatic terms, "bu there seems to be a determination to allow the bill to come to a vote after reasonable debate, and I have reluctantly bowed to the will of the majority.

Frye's implied intimation that any agree ment had been reached by the Republican side to allow the bill to come to a vote. He knew of no such agreement. If there was a division in the minority as to the course to be pursued, he wanted hi (Dolph's) position distinctly understood. He was willing to adopt any method to defeat the bill, and could not be shake in his conviction by clamor or threats.

Mr. Allison was emphatic in his statement that there had been no agreement on the part of the minority as to what should be done, but he assumed that the future would develop their attitude.

Mr. Chandler also bore testimony to th fact that no agreement had been arrived at on his side of the chamber. At 12:20 the tariff bill was taken up. Mr. Gallinger was about to proceed with his speech, but at the request of Mr Hale asked the floor to let the senate go ahead with the consideration of the schedules. In doing so Mr. Gallinge denied that he was engaged in making speech against time. His speech had

been carefully prepared; much time had been spent in its preparation, and he in tended to deliver it in an orderly manne passed over Thursday night during the closing hour of the session was then reclosing hour of the session was then sumed. The debate was of the usual unsumed. The debate was of the usual unsumed.

Soon after the house met it found itself with filibustering on its hands, caused by a motion to consider appropriation bills running counter to private bills.

The legislative, executive and judicial appropriation bill was taken up after an

agreement was reached to close genera debate at 5 o'clock, and that the hous adjourn over Saturday. The discussio of the bill opened up several interesting and important questions, among them being the sugar bounty question, the pension frauds investigation and the docking of members' pay for absence.

Considerable opposition to the mode of docking members was manifested, th

principal opponents being Representative Boatner (Dem., La.) and Representa tive Mahon (Rep., Pa.), though both members condemned absenteeism in the The discussion on the sugar bount

Mr. Bingham, taking as his text the ap propriation of \$200,000 in the last appropriation bill for investigating the alleged pension frauds, made an attack on the pension policy of President Cleveland and Commissioner Lochren.

# PATENTS

# FOR INVENTIONS.

Equal with the interest of ti ose having claims against the government is that of INVENTORS, who often lose the benefit of valuable inventions because of the incompetency or inattention of the attorneys employed to obtain their patents. Too much care cannot be exercised in employing competent and reliable solicitors to procure patents, for the value of a patent depends greatly, if not entirely upon the care and skill of the extension entirely, upon the care and skill of the attorney.

With the view of protecting inventors from worthless or careless attorneys, and of seeing that inventions are well protected by valid patents, we have retained counsel expert in patent practice, and therefore are prepared to

# A DELUGE OF RAIN

Has Caused Pennsylvania Rivers to Rise Above the Danger Line.

DAMAGE WILL BE WIDESPREAD.

No Fatalities Have Been Reported Thus Far.

WILLIAMSPORT, Pa., May 21.-With the horrors of the disastrous flood of 1889, which spread death and destruction through this valley, brought back to memory by the threatened danger of a sweep of water that promises to be as great as that of five years ago, the people of this city and all through the west branch valley are in a state of panic.

Since Friday night a steady and almost continuous downpour of rain has been swelling all of the streams, and numerous cloudbursts along the Pine creek and other tributaries of the west branch of the Susquehanna have made it impossi ble to confine the water within the banks of the streams. It has therefore spread out over the county, and at every point is pouring into the main river.

Advices from all points up the river say the same conditions exist. A cloudburst at Keating raised the river there 20 feet and the river at Renovo is reported higher than in the flood of 1889, when half the town was under water. Above there and extending to the head waters at Clear-field every town and hamlet has been reduced by the water to the conditions that

The gas company's works here have been temporarily abandoned to the rising waters, and many residences and business houses are flooded to the second floor. The new iron county bridges at Maple ton, Mill Creek and Trexlers have bee swept away.

The country approaches to Huntingdon have been closed to travel by the destruction of bridges and washouts.

Life of Anarchy.

PARIS, May 21. - Just as day was breaking this morning Emile Henry, the narchist, who was condemned to be decapitated for causing the explosion in the tafe of the Hotel de Terminus in Febmary last, was led from the Prison de la Roquette to the instrument of death that stood just outside the prison walls in the

Place de la Roquette. As the gate swung open to allow of the passage of the condemned man and those who accompanied him, the crowd that had gathered to witness the execution re-peated in subdued tones "Here he comes," and then the prisoner came into view. As he passed between the portals of the prison he showed no sign of trepidation. On the contrary, he wore the same air of braggadocio that has marked his conduct durgadocio that has marked or to the conduct durgadocio that has marked or to the conduct durgadocio that has marked his conduct durgadocio that his c ing his trial, and as he stepped outside the gate the silence was broken by the cry of "Vive l'Anarchie," which broke

from his lips.
From the Place Voltaire to the Boulevard de Menilmontant the Rue de la Requette was packed with humanity, except the space immediately in front of the prison, in the center of which stood the guillotine. The crowd was kept from infringing on this space by a strong guard of troops and gendarmes. Soldiers and policemen were also stationed in the adjacent streets and about the Prison des Jesunes detenus, which is situated on the pposite side of the Place de la Roquette from the Roquette prison. Their presence, however, was not needed to keep order, as the crowds of people present, made up chiefly of the lowest classes of the population, made no disorderly dem-

Then there was a flash as the heavy glittering knife dropped. At the same moment, Henry cried out again, "Vive l'Anarchie," and then there was silence. The head of the anarchist dropped into the basket in front of the guillotine, while a torrent of blood flowed on to the deep layers of sawdust placed at the nead of the guillotine.

The headless trunk was quickly un bound from the plank on which it rested, and together with the head was hastily deposited in the coffin prepared for it. Then the coffin was placed in the black van that is a feature of every execution n Paris, and the remains were hurriedly onveyed to the "turnip field," the burial place of executed criminals, where it was interred. MANY PEOPLE are asking if the board of health should not in some way mark houses where people are sick with contagious diseases.

There are a number of cases of diphtheria in Quincy and as the houses where such cases exist bear no distinguishing mark drivers of grocery teams and the like who daily call at these houses are constantly exposed and there is great danger of the disease spreading. If houses where there are cases of diphtheria were marked in some manner people would act knowingly.

### AN IMPROVEMENT.

The Unsightly Spot North of First Church Again Under Consideration.

The Committee on Streets of the City Council have under consideration the imountain in the square near City Hall.

There has been a question as to who owned that plot of land between the First church and the fountain, many claiming that it was a part of the original church

The matter has been carefully looked over by Mr. Edwin W. Marsh and it has been ascertained beyond all doubt that the land is a part of the old common or training field as it was called.

As the land is situated now with a private way leading from Washington street to Hancock street, between the First church land and the fountain, it is unsightly and with teams constantly passing, it is at times quite dangerous to foot passengers crossing to the fountain.

The plan as proposed by the committee on streets is a good one as will be readily seen by anyone who will take the trouble to look up the matter.

property between lines drawn from the east side of the fountain to the post at the outer end of the First church chapel, and from the west side of the fountain to the corner of the First church property. This modore Faxon asked for opinions concern-We would like to have every one who will close up the private way referred to the stablishment of a "cruiser class." Mr. Fred B. Rice and others favored the sidewalk on the west side of the green and thus giving people an opportunity to walk to the fountain without fear of danger.

This plan if accepted will establish a sort of park and restore in part the old training ground. Besides this, much of the tide of

The club house in years past has been opened without any gether after the usual interregnum of eight Intelligence from the North, South, East was established in 1837, and is the acknowl- formal ceremony to call the members tomonths. The club has been extremely conservative, more so than any other yacht club, in the way of entertainments and smoke talks, but the new house committee, seconded by the commodore and the executive committee, propose to also cater to the members who do not care especially for dances and regattas. Heretofore, unconsciously perhaps, this large membership of the club has been ignored in mak ing up the programme at the beginning of the season, but now it is proposed to have one or two smoke talks, with light refreshments and orchestra music, during the season at which one or two distinguished specialists will be present to entertain the members. And it is further more talked that if the rapid increase in membership continues, a place may be secured for winter quarters in the vicinity of City Square. avenue.

TALK OF A COMPROMISE.

The Only Way the War In Southern Brazil Can Be Ended.

LONDON, May 21.-The correspondent of The Times, writing from Buenos Ayres, says that President Peixoto of Brazil has still to deal with the forces of General Saraiva and other powerful bodies of insurgents in the state of Rio Grande do Sal. The correspondent adds: General Saraiva is marching to join G neral Tavares. Before he started, he said to me:

"If the navy fail on the coast I shall march to the city of Rio Grande and de-clare the independence of the state." General Saraiva further said that he has now more men and munitions and better resources than he had during his year's fighting before the naval revolt occurred. General Martins, with whom I have had many interviews since my arrival, is of the opinion that the war in Rio Grande do Sul will continue for a long period unless a reconciliation between the two par-

ties is brought about.

An emissary from President-elect Moraes has already approached General Martins on the subject of a compromise, by means of which peace will be established in the south. General Martins expressed himself as willing to undertake naval officers who have taken part in the revolution be reinstated in the grades they held before the beginning of the civil war; that free elections be held of Rio Grande do Sul be appointed, and pardon be granted to all political offenders.

I cannot see much likelihood of these terms being acceded to at present, especially as with a free election President Moraes would probably lose his seat. On the other hand, the conditions asked are by no means so onerous as to be lightly rejected by the government, if they would insure peace and quiet in the immediate future.

President Peixoto has already offered amnesty to the Brazilian soldiers and sailors at Montevideo and Buenos Ayres, ernment of their intentions to accept liquor prosecutions. President Peixoto's offer.

The people of both Montevideo and Buenos Ayres have done much to assist the unfortunate insurgents who landed in those cities in an almost destitute condition. They number about 2600, and large sums of money have been subscribed to provide the great amount of food and clothing required. Medical attention has also been furnished them.

The Storm at Atlantic City.

ATLANTIC CITY, May 21. — A severe northeaster prevails and the tide is breaking over the promenade all along the beach. Yachtsmen wharf is slowing breaking up. The big steel steamer Brigantine is tossing at her wharf. Her crew has deserted her and it is feared she may be beached. Several schooners in the inlet are also in danger of going ashore on the Meadows.

To Foreclose on the Whole Town. MANCHESTER, N. J., May 21 .- Sheriff Chambers will next Wednesday sell to the highest bidder the whole town of Manchester, railroad shops, churches, schools, stores, residences—all but the citizens. This is the result of the act of the Mutual Life Insurance company of Newark in foreclosing a mortgage held on the entire

Why Neglect Old Citizens?

To the Editors of the Daily Ledger: Are the Quincy water works to be extended for the benefit of the citizens or to benefit real estate schemes, is the question that naturally arises when the vote of the water commissioners last Thursday night is taken into consideration. It was voted, as reported in the LEDGER, to extend the pipes to Montclair, to reach just six houses, some of which are not occupied. How can this extension be considered a benefit to the citizens. It will boom Montclair, and help an out of town land company to sell its lots, while other parts of the city, whose residents have been asking for water for the past two years are left to suffer. Take Common street for instance. A short extension from Copeland street

would bring in a large revenue to the city

from a score of takers and all are old citi-

zens whose claims should be recognized. West street is as thickly settled as any part of the city, but the petitions for water from the residents have been unheeded. Besides this the board of health has in its report for the last three years called attention of the necessity of water the pacification of Rio Grande do Sul, but | in this locality on account of the number he demands that all the military and of typhoid fever cases arising from the use of well water. There is Adams street. Robertson street, and parts of Willard street, all these places need water and throughout Brazil; that Governor Castilho | these extensions will pay a good dividend to the city. Copeland street, right in the business section of Ward 4, is without water. ONE OF THE OLD RESIDENTS.

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and

ventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. The prospect now is that the entire week will be devoted to the tariff without at-tempting any other business than that can be done in the first half hour of the daily sessions, and possibly an occasional brief executive session after 6 o'clock for the disposition of uncontested nomina-

Senator Harris has reaffirmed his intention of pushing the bill forward rapidly, but he said he had no idea of an attemp to extend the daily sessions beyond 6 o'clock as long as the work should go on as satisfactorily as it is going at present. Senstor Aldrich expressed the opinion that the week will be spent upon the metal and woolen schedules, and he says the discussion will go on much as it has during the past week—that the Republi-Victor, 1894, \$125. changes made in others. He says that many paragraphs of the metal schedules are acceptable to the Republicans, and that, taking the times and conditions which now prevail into consideration, the rates in some instances are even more liberal than those of the McKinley law. He says, however, that there is dissatisfaction with the miscel-laneous items of the schedule, and that these will cause considerable debate. He also says the lumber question will be d's cussed when the wood schedule is reached Senator Aldrich thinks it improbable that the sugar schedule will be reached during the week, while Senator Harris considers it possible that it may be. They agree that this schedule will develop a sharp debate.

Lively Time Promised. The state bank issue, which has been gathering strength at caucuses and conferences ever since congress assembled, promises to be fought to a finish in the

ouse this week. It will bring out a sharp contest on party as well as economic lines, as the state bank plank of the Democratic platform has advanced the question to a place

of importance, second to only those of tariff and silver. The most important committee work of the week will be the reporting from the rules committee of a recommendation that the naval committee investigate the

BEWARE OF FRAUDS.

For The Sake of Profit They Will Sacrifice Principle, Health, Etc.

Unscrupulous dealers are trying to sell ordinary Glauber Salt or a mixture of Seidlitz Powder as "Artificial Carlsbad Salt," "Sprudel Salt," "German Salt" or "Improved Carlsbad Salt," and under other similar names. The Natural Remedies of Carlsbad can not be imitated.

"What Nature makes, man can not im prove." Artificial made wines will never replace the natural juice of the grapes. Neither can the natural waters of Carlsbad, nor the Carlsbad Sprudel Salt be replaced by the cheap substitutes offered to a guileless public for the sake of the larger profit made thereon, by these unscrupulous dealers.

No one would buy artificial wines knowingly. Why buy the imitations of the Carlsbad products, when your health is at stake? The Carlsbad Sprudel Waters are a specific for all diseases of the stomach, liver and kidneys, and have been used with great benefit by hundreds of thousands of people. The Carlsbad Sprudel Salt, which is evaporated from the Sprudel Water at Carlsbad, is an excellent Aperient, Laxative and Diaretic; is an alterative and eliminative remedy, which dissolves tenacious bile, allays irritation, and removes obstruction by aiding nature, and not by sudden and excessive irritation, as most cathartics do. The summer months, when plenty of out-door exercise can be had, are the most desirable for the "Carlsbad Cure." Use the imported Carlsbad waters, or if it is not convenient to use the waters, or when a more decided laxative effect is desired,

use the Carlsbad Sprudel Salt. In ist upon the genuine, which is imported direct from Carlsbad, and must have the signature of Eisner & Mendelson Co., Sole Agents for the U.S., 152 & 154 Franklin St., New York, on every bottle.

and the city is without light.

Dispatches from Williamsport say that the flood reached its maximum height at overruled by the house on an appeal. 7 o'clock last night, when it was 35 feet above low water mark on the river register, and was eight feet deep on the pavement of the courthouse in the center of the city. The moment was an anxious one, and another foot meant still greater destruction. Already the waves were lapping the windowsills of the second stories of hundreds of houses. Will it go higher? Eager watchers scanned the register, trembling with mingled hope and

The 35-foot mark proved an insurmountable barrier. For an hour the water hung at that point, and then, to the intense re-lief of thousands of anxious hearts, it began slowly to recede.

A 9 o'clock it had fallen a foot and was still going down, slowly to be sure, but surely enough to lift a terrible load from a multitude of hearts. All now feel that the worst has come and gone. The river has made a new record, 35 feet above low water. A million and a half in property has been destroyed, but so far as can be learned no lives have been lost. To give the losses in detail will be impossible. It cannot even be approximated, and the estimate of \$1,500,000 is a conservative one.

THE DLDEST TWINS.

Livira and Elustra Fife of Peterboro, N. H. Are Entitled to the Honor. At Peterboro, N. H., live Elvira and Elmira Fife, who claim to be and probably are the oldest twins living. Next August they will be 83. At the age of 14 they entered the employ of a local manufacturing company, and for 60 years they remained on its pay roll, the maxfmum wages earned being 99 cents per day and the minimum 71 cents for three days' labor.

A Boston Journal reporter recently visited them. "Is it true you have never ridden on

railroad train?" queried he. "It is," was the reply, "and, what is more," said both in one voice, "we never will. Although the Boston and Maine railroad has run cars within 10 rods of our door ever since they built the road into this town, we have never yet entered a car. We came pretty near it at one time. A few years ago some of the townspeople wished us to take a ride in the cars, and we came so near it that we went to the depot, but backed out before we got aboard."

Nor have these ladies ever entered a theater, and very rarely did they enter society, and in all their lives they have been separated but 70 hours at any one interval, and when Elvira was taken ill and it was for a few days thought she could not recover Elmira was nearly crazy and threatened to commit suicide if her sister was taken away.

"I don't wish to live if the old woman," as they always call each other, "is

taken away." The strong resemblance between them is still as prominent as ever. One great peculiarity about these women has been that, although living in the same house and eating from the same table, they Massage and Medical Gymnastics. have always lived separately—that is, each has cooked her own meal. If one had a boiled dinner, the other had a boiled dinner, and it was not cooked in the same pot either. NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of experiment does not effect the progress of the same of the government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of gov-ernment to deter him from quickly conceiv-ing the remedy to overcome existing dising the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been 'lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the 'No patent, no pay'', ystem. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obquick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. C., representing a large number of important daily and weekly papers, as well as general periodicals of the country, was instituted to protect its patrons from the unsafe methods heretofore em-ployed in this line of business. The said Company is prepared to take charge of all patent business entrusted to it for reasonable fees, and prepares and prosecutes applications generally, including mechanical inven-tions, design patents, trade marks, labels, copyrights, interferences, infringements, va-lidity reports, and gives especial attention to rejected cases. It is also prepared to enter-into competition with any firm in securing foreign patents.

### WEATHER AND CROPS

The Temperature Has Been Very Much Below the Normal.

FROST HAS CAUSED DAMAGE

But Most of the Fruit Crop Is Likely to Mature.

Boston, May 22.-The New England weather service, United States weather bureau, issues the following weather-crop bulletin for the week ending May 21, 1894. All the first part of the past week was cold, dry and windy, with frequent frosts. At West Milan, N. H., the temperature fell to 27° on the morning of the 15th, and to 28° on the mornings of the 16th and 17th; on the latter date ground froze here in many places. At Northfield, Vt., the temperature fell to 33° on the 15th, 34° on the 16th and 30° on the 17th. Ice formed at Holden, Me. These are extreme cases, however, and generally while frosts were experienced on low-lands, the higher ground escaped injury. For the week, as a whole, the temperature at Boston averaged nearly 3° a day below the normal. It was very close to the normal at New London, Conn.

Victor, 1894, \$125.
Templer high grade, \$75.

A. L. BAKER, Wollaston.

Copious rains have fallen throughout New England since the 18th, and strong, cold easterly winds have prevailed. In northern and eastern Maine the rainfall has been from one-fourth to one-half an inch, and in south central and southern Maine from one to two inches. Slightly more than one-fourth of an inch fell in northern New Hampshire and Vermont, and over three-fourths of an inch in the central and southern parts of those states. From three-fourths of an inch to nearly one and one-fourth inches have fallen in northeastern Massachusetts, while 1.46 inches fell at Hyannis on Cape Cod and only 0.20 inches at Nantucket. Half an inch fell at Block Island, R. I., and three-fourths o an inch at Kingston, on the adjoining mainland. At New London the fall was 0.61 inch; at Greenfield Hill, in the south-western part of the state, it was 1.33 inches; at West Simsbury, in the north-western part, the fall reached 2.96 inches, and at South Manchester, across the Con-necticut river from the last named place, it was 2.24 inches. At West Simsbury the rainfall on the 19th and 20th was more than for the previous six weeks.

Maine. The correspondents from Maine report favorable weather for team work, and much has been done, but the wind has hindered seed sowing, and the pastures and newly seeded pieces have felt its dry-ing influence very much. Potatoes and other vegetables were slightly nipped by frost, hut no damage has been reported to fruit. One advantage from the dry weather is in enabling work to be done on naturally wet land that could not be touched in average seasons. Fruit is in blossom, except in the extreme north,

and is very promising.

New Hampshire.

In all the central and southern parts of New Hampshire much damage is reported from the frosts on lowlands. Beside injuring very much all early plants that were above ground, clover was damaged, and in places fruit blossoms and leaves frozen. It is thought by some that apples and blueberries are damaged quite a good deal, though others think there will be plenty on the trees that will mature. Pastures are reported very backward and poor. The correspondent at Grafton reports that unless the weather is very favorable in June, the hay crop will be light. Much planting remains to be done in this state, though the work

French Millinery Parlors has been pushed rapidly.

Vermont.
All growth was very sl All growth was very slow in Vermont until the last of the week. The corre spondent at Burlington reports that some damage was done by frosts to strawberries and early vegetables in South Burlington, "some fields being entirely wiped out." At South Randolph the frost killed the grape vines and leaves.

A few of the apple blossoms were turned brown, but it is not possible to tell yet whether material damage has been done to fruit or not. Many potatoes and some

corn have been planted Massachusetts. In Massachusetts, correspondents re-port that just before this rain some grass fields did not look so well as a week ago; the stalks were spindling up very thin and had begun to head out. Where this is the case, it is thought that the rain will help but little, though generally it will thicken up and be much improved. Many garden seeds failed to germinate, and all crops were growing slowly. Quite a good deal of damage was done by the frost in the eastern and southern counties. In eastern Massachusetts black berries have set heavily and are nearly ready to blossom. Tent caterpillars are not at all plenty, but canker worms are very thick and doing damage. They are re-ported from West Acton, Leominster and

Rhode Island. In Rhode Island little damage to fru 's is feared by the frost, but early vegetables suffered slightly. The corre spondent at K ngston reports that ice formed to the thickness of a windo pane. Planting has not been yet com-pleted, though very much has been put in. The fruit prospects continue good.

Connecticut. There was some damage to strawberries and vegetables on lowlands in Connecticut, but as far as reported fruit was no injured. The wind and rain have lodged the rye badly in central districts, and it is feared that the high cold wind along the coast will blast much fruit.

The correspondent at Milford states that one orchardist reports his set of pears mostly on the ground, as the wind has whipped the trees badly. Peas are in blossom in the southern counties; potatoes have been hoed; corn is growing f.st.

In the West and South. For the week ending May 14, warm and dry weather prevailed over the entire Pastern part of the country, except in the southern cotton belt, where rain was abundant. Light frosts were felt over most of the northern states, but no great damage was done. In North Carolina to-bacco transplanting had been delayed by drought; the plants were scarce and the acreage small. In Missouri and West Virginia there was much complaint of fruit dropping. Fruit prospects were rethe largest and most influential newspapers in the United States, for the express purpose of protecting their subscribers against unscrupulous and incompetent Claim Agents, and each paper printing this advertisement vouches for the responsibility and high standing of the Press Claims Company

Burglars About Last Night But Not Very Successful.

Burglars were about Quincy Tuesday night, but as far as known they were only successful in one case, at the furniture store of Frank F. Crane on Chestnut street. The parties smashed a hole in the panel of the back door, evidently with the intention of turning the key but there was no key in the door and entrance was had by forcing a window.

The money drawer in the office was forced open and about \$1.50 in coppers was

Two trunks of Abbott & Miller's express, who have an office in the front part of the store, were opened, and the contents scattered about, but as far as known nothing was taken, although it will not be known for certain until the owners have examined their property.

An attempt was also made to enter the drug store of Stephen A. Pierce on Hancock street, but they were frightened away by Mr. Pierce, who sleeps in the store, who was awakened shortly before midnight by their coming upstairs.

Thompson's Island School.

The annual report of trustees of the Farm school on Thompson's Island, off Squantum, shows an average of 100 boys at the institution all the time during the year. The expenses during the year were \$20,637.09, and the total receipts were \$18,-

The school is a farm school and not a reform school, as many have the impression. Its boys have committed no crime, but are usually orphans or the sons of widows who are unable to provide suitable homes for their children, or to give them proper care

A PROBLEM IN BEESWAX.

Men of Science Puzzled by the Deposit on the Shore of the North acific. The beeswax found in large quanti-

ties on Nehalem beach has from time to time for years past attracted the attention of the curious and enlisted the inquiry of scientists. The generally accepted theory that in some prehistoric era a vessel, wax laden, went ashore at that place is frequently disturbed by some less probable surmise for a time, and after exciting some speculation and comment drops out of sight. The latest of these comes from Mr. Odlum, who, in connection with the department of archæology of a British Columbia college, is collecting data from which he proposes to show that the Indians of the Pacific coast are descendants of certain Asiatic races. He desires to know whether the wax found at Nehalem is actual beeswax or mineral wax, hoping to forge a missing link in his chain of evidence by means of information upon that point.

It has been shown by careful scientific analysis that the wax is of mineral origin, but it may be said in this connection that the substance is to all appearance genuine beeswax; that this appear ance is corroborated by the faint, subtle odor of beeswax, which lingers around the storm beleaguered specimens that have been from time to time brought up from the beach, and that no one from tasting it could tell that the tive. piece sampled was not identical with that surreptitiously bitten from the yellow, thread marked ball which was a part of the furnishing of his mother's workbasket in his boyhood. More than this, the wing of a bee has been found imbedded in the wax, furnishing irrefutable evidence of the true nature of the substance.

The Pacific coast Indians may be descendants of an ancient Asiatic race, but it is not likely that any more conclusive proof of this will ever be developed by the most painstaking research than that which this little brown bee's wing furnishes of the fact that the Nehalem beeswax is beeswax. How it came initely until the secrets of the unremem- of work. bered ages are rescued from the tomb of time and incorporated in the written history of the days that were, but now are not. Practical people are not looking for an occurrence of this kind; hence they are prepared to accept the evidence of their senses in regard to the nature of this mysterious deposit in the sands of the seashore and to abandon attempts that are more than likely to prove futile to discover how and when the beeswax, fantastically molded and curiously stamped, voyaged thither and was thrown upon the beach.-Portland Ore-

WOMEN IN SMOKERS.

A Squabble on In England Over the Desire of Women to Ride In Smoking Cars.

Englishmen and women have been discussing to the extent of column after column the indignant letters in one of the great dailies on a subject which, it is safe to say, will not soon arise on your side of the Atlantic. It is a growing practice of women to ride in the smoking compartments of the railway carriages. All the woman haters have joined the chorus of denunciation of the invasion. They argue that the sign 'Smoking' means for men only, just as other compartments are reserved for women only. This is resented by the new privilege seeking women, some of whom admit frankly that they love tobacco fumes, while others allege the superior germ killing and sanitary advantages of a tobacco laden atmosphere in

promiscuous company. The men retort that selfish women go among the smokers because they receive courtesies and attentions which they do not get from their own sex. The squabble is developing a degree of heat and bitterness that is truly alarming. -Lon-

don Cor. New York Sun. Sam Jones' Prescription For Biliousness. After the tremendous men's meeting the other night Brother Sam Jones was thoroughly exhausted, and he felt sick. Brother Jones is of a bilious temperament, and his sallow complexion tells plainly that while all is well between Brother Jones and his soul there is war between him and his liver. Brother Jones felt bad at bedtime, and Brother Owens told him: "Go to God with it,

brother. He'll straighten you out." "Take a dose of pills," suggested the reporter. And Brother Jones followed the advice of Owens and the reporter, and as a result when he got up this morning he was all right and much refreshed. He said:

"Prayer was the thing, but I must admit that the pills did much good, and

SARSAPARTHE
HONEST KIND 

Receives the Highest Praise from the Best Physicians. DR. H. F. MERRILL, the wonderful spec-

ialist of Augusta, Maine, after giving it a thorough trial in his practice, writes the following convincing letter of praise: GENTLEMEN:-I have of late been using some of your medicine in my practice with the most pleasing and satisfactory results. I find that it acts like a charm upon the whole nervous system, and in scrofula and all cutaneous diseases. Its

curative properties are fully equal to the claims made for it, and I do not know of one instance where it has not fulfilled all its claims. In cases of General Debility and Nervous Prostration it has proved itself invaluable. It also gives quick relief in Dyspepsia and Canker of the stomach, and s a remarkable fine restorative remedy. It is a great pleasure to be able to recommend such a remedy, as the results following its use are so wonderfully satisfactory. One great thing in its favor is its freedom from superfluous alcohol, and all injurious ingredients.

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing de-ficiences, does not permit the affairs of gov-ernment to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an appli-cation for patent. Valuable interests have been lost and destroyed in innumerable incation for patent. Valuable interests have been lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY. John Wedderburn, General Manager, 618 F street, N. W., Washington, D. SENATE FIXES RATES ON IRON.

Civil Service Reform.

WASHINGTON, May 23 .- Members who have interested themselves in the subject say that the debate on the bill to repeal the 10 per cent state bank tax will be the most spirited and acrimonious of any that has occurred during the present

The lines are being rigidly drawn and it is difficult at this time to predict what fate the measure will meet. It is believed that the majority either for or against the measure will be small. The Republicans will oppose it almost unanimously, although some of the representa tives of that party from the extreme west and northwest are disposed to regard i

The sent m nt among the Democrats is divided, alth ugh a preponderance of the party are sturdy supporters of the bill. Mr. Springer of Illinois, the chairman of the house committee on banking and currency, will make the opening speech in opposition.

Will Probably Be Defeated.

Mr. Springer said yesterday that in his opinion about 60 Democratic votes will be cast against the bill. If this proves to be the case, and Populists and Republicans take similar action, the bill will probably be defeated by a small majority. If there be a full attendance of the house, and the Democratic vote is not more than 40 against the bill, it will probably carry by a small majority.

The eastern Democrats, particularly those from New York and New England, are in the main favorable to the proposi tion. Some of the D mocratic friends o the bill will insist upon unconditiona repeal. Others as stoutly assert that they will agree to repeal only with certain limitations; such as, for example, surrounding the proposed state bank system with safeguards in the form of federal

Republicans Cried "Spoils." The question of civil service reform was given full sway in the house, the oc casion being the amendment to strike out the paragraph in the legislative appro-priation bill providing for the civil service commission. It gave opportunity for some stirring and not a few amusin speeches. The amendment was adopted by a vote of 109 to 71, amid great Demo cratic applause and Republican cries o "Spoils." No other amendment of any importance was made in the bill, the only ones adopted being to correct the total of a few amendments to which amendments were made on Monday. ### EXCELLENT RESULTS.

Deep Sea Inspection of the Columbia Proves to Be Satisfactory.

PHILADELPHIA, May 23.—The cruiser Columbia arrived at the League island navy yard yesterday afternoon after her deep sea inspection. The inspection included testing boilers, screws, six-inch guns and drilling of the crew.

The navy department was particularly anxious that the three screws of the cruiser should be completely and satisfactorily tested. The test with the screws was satisfactory, the vessel developing 18 1-2 knots an hour under natural draught, without any particular effort being made to force her, this being considered an excellent result for a vessel lying so deep in the water.

A careful test was also made of the

speed attained by using a fixed number of tons of coal, the purpose being to tabulate the figures for the future guidance of the commander during long runs. This test resulted in showing that the cruiser will use 70 tons a day going 14 knots, and

85 tons going 10 knots an hour.

In the working of the guns, some trivial defects were developed, which can be easily remedied. The guns were each fired three times, twice with a full service charge, and once with a reduced charge. Slight defects were found in the secondary battery, and it was also developed that the opening at the sponsons were too small, and that sufficient room had not been left behind the guns to allow them to be freely swung when they are worked by the full gun crew.

### LONG JOURNEY ENDED.

Boston Contingent of Industrials Has Reached Washington,

WASHINGTON, May 23.-Michael Fitzgerald, with his band of 43 industrial delegates, as he styles them, arrived in this city shortly after 5 o'clock yesterday afternoon, and the organization has taken up quarters in the small chapel annex to the Mt. Zion Methodist charch, a home of worship for negroes in the northwest section of the city.

The chapel is just about large enough to accommodate the industrials and is equipped with wooden benches, which the men used for beds last evening.

Shortly after quarters were taken up by the delegates in the chapel, the police lieutenant of the precinct entered and made a little speech to the men. He said that law-abiding people would not be molested by the police. He received assurances from Fitzgerald that there was

to be no breaking of the peace. Fitzgerald says his men do not expect to stay here more than three or four days. They have a petition to present to congress, but have not as yet made any plans concerning the manner of presenting it The petition is strongly socialistic in its nature and goes much farther than ths Coxey plans. Fitzgerald says his men are in sympathy with Coxey, but that they are not in any way connected with him or

Democratic Senators In Line on a Test Vote on the Tariff.

THREE POPULISTS WITH THEM.

Onslaught on the Civil Service Commission Resumed.

WASHINGTON, May 24 - Senator Gorman's speech was the feature of yesterday's session of the senate.

Mr. Gorman and Mr. Brice have been credited by the opposition with the joint ments which consolidated the Democratic side. This speech was a reply to the attacks that had been made upon him explaining the necessity for the compromise and defining the theory upon which the modified bill now before the senate was constructed. The speech was delivered from manuscript. Mr. Gorman, heretofore, always has delivered his speeches without notes. The main point of the speech was that the Democrats would

A sensational incident grew out of Mr. forman's speech. Mr. Aldrich replied briefly. The Maryland senator, he said occupied a unique position in the councils of his party. Like Henry Clay, he believed in compromise to save his party from defeat. Like his distinguished getting and abandoning his party declara-

### Editorial Comment.

THE PROPOSED amendment to the City Charter, relative to contract labor, is too sweeping and of doubtful expediency, if ment of the city, the former to vote for the Mayor who coincides with their views. Schoolhouses in the past have been built by contract, and this year hose houses will be built by day labor. People will have a Rockland and other towns, visited the chance to see the workings of both systems. Most people in building a house prefer to do it by contract; in fact only the wealthy ville, Wednesday afternoon, at the invitaor well-to-do can afford to do it in any other way. The man of small means must know at the outset what a hoose will cost. Monumental and stone work is done almost wholly by contract by our granite men, and it seems the only business-like was. Much of the work of the city can and should be done by day labor. Some of the contract labor in the past has been unsatisfactory, cars. and the same is probably true of other work. The aim of every business man should be to use every opportunity of reaching every possible customer. Newspaper advertising is the instrument most likely to accomplish this end. Other means have been tried and have failed. For a time, circulars were considered to be as good a means of accomplishing success as could be devised; but those have been overdone and are not now read. Circulars almost invariably find their way, often with unbroken wrapper, into the waste-basket the directors for their kind invitation and or the fire. The Four Hundred Feet Lique: Bill. Street Car Heating.

Boston, May 24.-In the senate the bill prohibiting a saloon with 400 feet of a school was amended so that it applies only to the same street. It was then

passed to be engrossed. The house bill relative to the public records of cities and towns and to the duties of certain city and town officers was referred to the next legislature.

An interchangeable mileage bill, drawn by ex-Attorney General Pillsbury, was substituted for a senate resolve providing for an investigation of the subject by the board of railroad commissioners. The substituted bill is the same one introduced in the house by Mr. Hoar of Boston early in the session, and makes it compulsory for all roads to issue interchangeable tickets.

In the house the senate bill requiring the heating of street railway cars was passed to be engrossed.

### THAT STOUT MAN.

In the city of Brussels a great deal of very pretty lace is exposed for sale. Contractor Warren S. Parker is putting English women admire this lace and on the finishing work of the new Catholic buy it. If they go straight from Belgium to England, they can take it home The new house of A. H. Holbrook on without having to pay any duty, but if they pass through France they have to M. C. Willard's new house on Turner pay on all their new Brussels lace at the French custom house. And many Walter Wyman and family have arrived | English women pass through France on their way from Belgium to England, because they prefer the short passage from Calais to Dover to the longer one

The Misses Wylie were charming middle aged ladies, fond of travel, fond of dress, fond of lace and very bad sailors. They had been excursioning in Germany, had come down the Rhine and had spent a week in Brussels. More John Robinson of Braintree has arrived attractive than the field of Waterloo and more fascinating than the Muse Wiertz was the Galerie St. Hubert. Miss Men sa Wylie could not resist the white Brussels lace; Miss Annora Wylie could not resist the black. Each of the ladies bought; led on by the tempter, in the shape of a seductive shop woman, the Misses Wylie bought lace fichus lace collarettes, lace by the meter. Day

"It would not look unnatural on our bonnets," said Annora. They set to work to decorate their bonnets with the lace. They mingled white and black, fichu and flounce, in the most skillful manner, and though the bonnets looked somewhat overdone yet they carried the lace, and it was

anything abnormal. The Misses Wylie rejoiced in their lot in the Ledger contest last summer is cleverness. They sat in the train on their way to France with clear con-On and after April 16, 1894, trains will run as follows: (See note of explanation at bottom.)

"But we are wearing it!" screeched Annora. Melissa panted "Mesdames, I admire your ingenuity, but such an amount of new lace cannot be passed even on your bonnets. Two, three, five meters," he went on, measuring the unlucky lace with his eye, "fichu, flounce, etc. So many francs or I confiscate it."

"En voiture, s'il vous plait!" was heard.

The sum demanded by the officer added to what they had paid in purchase would have made the lace the dearest that ever was bought. They tore off their bonnets, pulled out innumerable pins, set free the fichus, flounces, etc., put them into the officer's hands and ran to their seats. Out of breath and out of pocket, they were most unhappy. Successful cheating is one thing, but unsuccessful cheating is another and

causes sharp pangs of conscience. "Too bad!" cried Melissa as the train moved on. "We were entitled to what we wore.

She still be lieved that he was a German who spoke English remarkably well, and she had seen that he was not a gentleman; she therefore made up her mind to refuse

the offer of marriage which no doubt he

would shortly make.

Arrived in Angelina gardens, the Misses Wylie were occupied in arranging the household, and a couple of busy days were spent by them. On the third day after their home coming they reletter. Annora opened the carefully tied and sealed parcel, while Melissa read the letter. Having read it once to herself, she next read it aloud to her sister: MESDAMES-I felt myself under a very great obligation to you the other day at Blandain. 1 am a very thin man, but I was swathed round with hundreds of yards of fine Brussels lace, and I thought that the best way of drawing the attention of the custom house officers from myself was to draw it to you. In England, spinsters and widows could vote if they were property holders. In Kansas women were given the right to vote on all school questions, and the results had been very good. Women were now doing the same work as men, in the same manner, but for half the pay.

Will Help Poor Women.

Enfranchise the women and the results will be different. The work for equal suffrage was not being done to help the wife of the millionaire, but to help the poor working woman, and put them on the same plane as the man of equal ability. Kansas had also granted women suffrage on municipal matters, and these too, had brought good results. The governments were better, and that, too, was the case in the state of Wyoming, where women had been granted the right of suffrage for 25 years. The governors of that state were all in favor of retaining that feature, and the people there were hearty in their praise of it.

She said that Colorado was the first state in the Union where a majority of the men had gone to the polls and had there voted to give the women equal suffrage. As to the question of the removal of property qualifications of women in this state, she said it was the vote of the poor man that removed it years ago. ### THE LAUNCHING.

The New Steamer "City of Quincy" Glides Into the Water.

Thursday afternoon about 2 o'clock the Steamer "City of Quincy" was launched at the yard of the Fore River engine works at Weymouth. The afternoon was rainy ing, Mr. Davies said he was an agent of witnessed the boat slide into the water.

On board at the time were several in vited guests including many young ladies; and Miss Edith Graham, daughter of ex-Representative John R. Graham of Quincy, the president of the company, broke a bottle of champagne over the bow to licenses was a farce." There was a commotion in the neigh-

borhood as the steamer glided into the water amid the salutes of whistles and the large number of young men in the store hurrahs of the people. Mr. F. O. Wellington superintended the

launching and there was no hitch in the public as some of the parties were present. It is thought that the City of Quincy, which is to be used as a passenger boat be-

over all, and draughts but six feet of water. Her capacity is 650.

### Changes at City Hall.

A number of alterations are being made n the interior of City Hall which will make a great improvement. The panels of the entrance from Depot street have Figures. been removed and windows put in. In the room known as the Ward or Lycum room \$5.25 an office for Tax Collector Brasee is being 5.25 built. Part of the partition separating that room from the ward room is to be 5.50 moved back, which will give the collector 5.00 a room ten feet square with a long counter across the front. The collector will have 5.00 Miss Bills as a clerk, and she will always 5.25 be in attendance.

Court room, Adams Building, Thursday afternoon, May 31st, at 3 o'clock. Directors meeting at 2.30 o'clock. It is requested that the names of all new members be presented at this meeting, that the list of the membership of the Association now being prepared to be printed in the next hospital report, may be completed at once. The ladies have undertaken this work, and are making strenuous effort to make such a list that when completed it shall contain the name of every member. If after it has been submitted to the public, any one finds his or her name omitted, and will notify the Association, it will be very store got on. glad to rectify the mistake.

### Coal and Wood Needed.

It is said that some of the teachers are complaining because there is no fire in the Willard school building some of the cold days we have had. The janitor is ready to build a fire to warm up the rooms, but in order to do so he must have wood and coal, but as he has neither of these two articles nothing remains but for the teachers and He had nothing to do with the movement scholars to shiver it out.

## PATENTS

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor who height on the the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of govficiences, does not permit the affairs of gov-ernment to deter him from quickly conceiv-ing the remedy to overcome existing dis-crepancies. Too great care cannot be exer-cised in choosing a competent and skilful attorney to prepare and prosecute an appli-cation for patent. Valuable interests have been lost and destroyed in innumerable in-stances by the employment of incompetent counsel, and especially is this advice appli-cable to those who adopt the "No patent, no nay" system. Inventors who intrust their pay" system. ## A WHACK AT GORMAN

Maryland Senator Severely Criticised by Senator Hale.

HOUSE ENDS A WEEK'S FIGHT

With a Victory For the Civil Service Commission.

Washington, May 25.—The senate proseedings were enlivened by a short debate on Hawaii and a very sarcastic speech from Mr. Hale on Mr. Gorman's speech. The Maryland senator, Mr. Hale said, had spoken none too soon. The Macedo- is not definitely known. It is, perhaps, nian cry had gone up, like the wail of a nian cry had gone up, like the wail of a lost soul, from the Democracy of the sponsibility for the killing, as many confused and contradictory statements are country for some one to appear as a leader in the senate. He read from Democratic papers ar-

raignments of the majority of the senate for the "surrender" of principle contained in the "Gorman-Brice bill." The senator from Maryland, Mr. Hale proceeded, had come forward with the effort of his life to re-form the broken Democratic ranks. The speech made by the Maryland senator, added Mr. Hale, was made not to the country, but to his Democratic colleagues. Mr. Hale continued with vivid

words and vitriolic comment to divide the Democratic side of the chamber into groups," to which he said Mr. Gorman had addressed his remarks. The "Groups" Described. The first group, he said, comprised the two senators from New York, Messrs. Hill

constituencies opposed to this bill. The second group-a large one-de spised the bill before the senate, because it gave the lie to the convictions and professions of a lifetime. It contained Messrs. Mills and Coke (Tex.), Vest and Cockrell (Mo.), Vilas (Wis.), Grav (Del.). (Ky.), Harris and Bate (Tenn.) and perhaps one or two others.

Messrs. Kyle and Roach. They represented

They were the men who when they vere obliged to vote for protection to coal and iron ore, to the Sugar trust and Lead trust, would ask themselves: "Is thy servant a dog that he should do this?' Then they would all vote for these provisions and answer their own questions. There was another group to which no appeal from the senator was necessary. It included Messrs. Camden and Faulkner (W. Va.), Morgan and Pugh (Ala.).

Gibson (Md), and the great com-promiser himself, Mr. Gorman, had given no anxiety to this group. Why? Because they had secured all they wanted. It extended to the confines of the earth, but he repeated that they

Caffery and Blanchard (La.), Brice (O)

had got all they wanted. Mr. Hale continued to point out in de tail specifically what he termed the "price" paid for votes in the latter group, calling attention to speeches made by these senators in the past The bill as it now stood, Mr. Hale said.

had no responsible parents. It was a political bastard. It was the result of the intercourse of those who had abandoned party principle with the easy virtue of a few protected in lustries and the habitual prostitutes of the trusts.

It was after 3 o'clock when the senate

The surprise of the day was the acceptance by the finance committee of an nt off red by Mr. Allen, the Nebraska Populist, to place barbed wire on the free list. Sever d Republicans opposed it, but did not carry their opposition to the extent of demanding a record-making vote upon it. An intimation from Mr. Hoar that free barbed wire was to be the price of Mr. Allen's vote for the tariff bill was indignantly denied.

A Week's Fight Ended. After being under consideration for just one week, the legislative, executive and

Another amendment proposed by Mr. Caruth and agreed to in the committee of the whole, which was designed to still further emasculate the civil service comission, was defeated in the house without division, as was also the amendment to equalize the salaries of the assistant doorkeepers of the house.

The only amendments adopted yesterday in the committee of the whole and agreed to by the house were to increase the appropriation for publishing the postal guide from \$15,000 to \$30,000, and an addional item of \$2500 for clerical service for the Dockery commission.

A FIGHT WITH DEPUTIES. Four Strikers Are Dead and an Unknown

UNIONTOWN, Pa., May 25.-The long threatened attack by striking miners on the pits of the Washington Coal and Coke company at Stickle Hollow in the Fourth pool district on the Monongahela river was made yesterday, involving another of the grim tragedies that characterize the irrepressible conflict. The fight was one of the fiercest in the history of the mining troubles in western Pennsylvania. Four strikers are dead and double that number are badly wounded,

some of them mortally.

Thomas Kenan is the only American killed in the encounter with the deputies The other dead men are Slavs. The wounded men who fell under the first volley from the deputies were taken off the field by the retreating strikers, and even now the actual number of wounded too soon to attempt to apportion the re The strikers furnished all the dead

men; not a deputy was fatally hurt and only three of them wounded. The fight occurred in the public roadway leading to the Stickle Hollow plant. Two thousand strikers came out there to intercept the men on their way to work. Some carried Winchesters, while others were armed with shotguns, muzzle-loading rifles and revolvers. Because of their threatening demon-

strations and the fact that they had given notice to the company that they had come to drive off the deputies if necessary, there were ball cartridges in the Winchesters carried by the guards and the entire outfit at the works was in general readiness to receive raiders. The deputies had specific orders, and it is admitted that the company ordered them to shoot to kill.

The offer of organic union has been rejected by the southern body and each will now continue to pursue its separate way.

The Smith trial has begun in the general assembly, and will probably continue until tomorrow noon. The argument of Professor Smith was a great one but, although pathetic, was addressed to an audience not at all sympathetic. The committee of prosecution occupied the afternoon and evening, arguing at great length and with great earnestness, but the audience was weary and the air bad. The moderator got tired and retired to the basement of the church for rest. The report made touching the supposed death of Dr. George P. Hays was found to

be a mistake. The telegram referred to the death of Dr. Isaac N. Hays of Pitts burg and was signed by Dr. George P. Hays himself.

### CARIFF AND HAWAII

Led to a Wordy War Between Senators Hoar and Harris.

IT HAD A PLEASANT ENDING

When the Bay Stater Apologized to the Tennesseean.

WASHINGTON, May 26 .- The senate disposed of five pages of the tariff bill yesterday, completing the consideration of the metal schedule, except the paragraphs relating to lead and zinc and their manufactures.

These paragraphs promised to precipitate a struggle of some pretensions, and, as they were reached late in the afternoon, it was deemed best to allow them to go room of the senate, where they spent over. Mr. Hill, it is understood, will some time in conversation with Senators make the fight against the duty on ar- Hoar, Lodge, Allen, Peffer and Kyle gentiferous lead ores and pig lead.

The interesting feature of the day was and Fitzgerald told the senators that they the debate on the Hawaiian resolution. represented as many trades. Mr. Kyle asked for a vote on the resolution, but Mr Gray insisted that if a vote was to be had on a resolution relating to Hawaii it should be on the one which Mr. Turpie had reported from the committee on foreign relations. That resolution had been carefully considered and had been debated at length in the senate. He moved to substitute that resolution for the one offered by Mr. Kyle.

Mr. Manderson did not understand how there could be any objection to the Kyle resolution in the senate, while on the Turple resolution, the main feature of which was an expression on the subject of annexation, there was material difference of opinion. He believed that as soon as the republic was organized in Hawaii, overtures looking to annexation would follow. The Kyle resolution simply declared a policy of non-interference. The Curpie resolution raised an entirely different question, and in view of the march of events might prove embarrassing. At this point, the hour of 10:30 arrived, and Mr. Harris insisted upon the regular

order. The tariff bill accordingly was laid before the senate. Mr. Frye protested against cutting off action on the Hawaiian resolution. It was of supreme importance to the Hawaiian Islands that the senate should take some action. Yet for three months, the senate had dallied in a manner that was utterly inexcusa-ble, and the people of Hawaii were on a pivot. The action of the senate might send them forward or backward.

Hoar and Harris Clash, Then followed a sharp clash between Mr. Hoar and Mr. Harris. Mr. Hoar was disposed to continue the debate. He said that it was the universal sentiment, not only of the senate, but of the country

diale between Mr. Hoar and Mr. Harris. For several days their thrusts at each other had been almost vicious. Thursday night Mr. Hoar referred to Mr. Harris as the drum major of the Democratic side. The passage-at-arms yesterday between the Massachusetts and Tennessee senators was the direct outgrowth of this remark.

Mr. Harris arose to move to lay the Aldrich amendment on the table. Mr. Hoar craved Mr. Harris indulgence for 30seconds to reply to an observation made by Mr. Blanchard. "In view of the excessive courtesy of the

Then Mr. Hoar stretched his hand across the breach. The observation he had made Thursday night, he said (referring to the appellation of "dram major" applied to Mr. Harris), had been meant as a jest.

He thought it was so understood. He had not intended to be seriously disrespectful to the senator from Tennessee. He held that senator, he said, in the highest respect, not only for his kindness of heart, but his absolute integrity and great intellectual capacity. In his opingreatest master of parliamentary law in the senate, and he desired to bear his testimony to his high and noble qualities of mind and heart.

The words of Mr. Hoar evidently touched the veteran senator from Tennessee. The kindest relations had always existed between Mr. Hoar and himself, he replied. He confessed that he had been stung to the quick. He accepted the explanation with pleasure and gratification, DYNAMITE HELD IN RESERVE. and felt greatly obliged for the justicethe more than justice-Mr. Hoar had done him.

Not Tom Reed of Maine. The entire afternoon in the house was

onsumed in a discussion of an omnibus resolution from the committee on war claims, grouping together 37 claims for cotton, etc., aggregating \$1,040,000. Half the time was taken up in a discussion on a point of order against the grouping of so many bills in one resolution. The only business transacted during the day was the passage of a bill for the relief of Thomas B. Reed, and the success of this bill seemed to be due in no small degree to the name. It happened to be a Pennsylvania veteran, with the same name as the ex-speaker, and the bill passed without opposition, amid considerable laugh-

Non-Union Men Blown Up With Giant Powder In Colorado.

Strikers Declare Their Intention to Kill Deputies.

CRIPPLE CREEK, Colo., May 26 .- Eleven men killed, with a strong probability that the number of dead will be increased when all is known, is the record of the first day of trouble here, although real fighting has not yet begun, as the deputies are awaiting reenforcements before beginning active operations.

At 10 o'clock yesterday morning 11 men started to work in the Strong mine on Battle mountain. Shortly afterward a large party of strikers blew up the shaftouse with powder, causing a loss of \$25,000, and then dropped 100,000 pounds of giant powder down the shaft, which was also exploded, killing all the inmates. Not more than 300 yards from the strong shafthouse, 16 men who had beer ence mine, were surrounded in their bunkhouse, and after a long parley agreed to surrender. Each one was armed with a rifle and a brace of revolvers-the arms are now in the posses-

sion of the strikers. It is rumored that the strikers attacked the Analee mine, overpowering the guards, after which they blew up the shafthouse, but the rumor has not been verified. When the deputies are finally massed and the two forces come together a most desperate battle will be doubtless fought. The situation is one of most painful anxiety. Not a few believe the town will be a smoldering mass by an-other sunset if the strikers be not re-

### NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the last and ready to perceive the existing dealert, and ready to perceive the existing de-ficiences, does not permit the affairs of gov-ernment to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exercised in choosing a competent and -kilful attorney to prepare and prosecute an appli-cation for patent. Valuable interests have beer lost and destroyed in innumerable instances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and ob-tain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. CENERAL ORDER NO. I.

### COMRADES:

The 30th day of May was designated as Memorial Day twenty-six years ago in a general order issued by Gen. John A. Logan, then Comnander-in-chief of the Grand Army of the Republic. It was his purpose to inaugurate the observance of a day with the desire that it would be continued from year to year as long as a survivor remained to honor the world. memory of his departed comrades.

The survivors of the conflict are fast passing away and a new generation is upon the battlefield of life, with only a written history before them of those years of bloodshed. It is befitting us, the remaining participants in the struggle for freedom and right, to commemorate this day by gathering around the graves of those of our comrades who have fallen by the wayside. Let us ever cherish the tender memory of our heroic dead, and as the spring returns let us garland the graves with the choicest flowers, and raise above them the dear old flag they loved so well.

Americans May Know Something About

London, May 26 .- Ex-Attorney General Webster in the house of commons asked the government whether the plans of the British torpedo destroyer Havoc, which had been stolen from the Yarrow Ship Building company, had found their way to the United States naval department. Secretary Suttleworth of the admiralty replied that the government had no information on the subject.

WASHINGTON, May 26 .- Naval officers here are silent when the matter of the plans of the British torpedo destroyer Havoc are broached. The Havoc is a small boat of about 220 tons displace-ment. She is about twice as large as the Cushing. She was built by the Yarrow company, and the peculiarity of the boat is her speed, which has run up 26.7 knots, or more than any vessel of her size in the

Doubtless it was this remarkable achievement which induced our naval officers to make an effort to obtain her plans and see how it was done. There has not been much concealment in such matters between our navy department and the British admiralty heretofore, and neither has hesitated to apply to the other for information, whenever desired. British officials have been supplied freely not only with information of but opportunities for watching the tests of modern armor plates produced by our patent process, and in return we have been courteously treated whenever ap-Havoc have been so procured cannot be

### THE SUGAR SCHEDULE

Will Be This Week's Special Feature In the Senate.

THE DEBATE ON STATE BANKS

Has the Right of Way on the House Program.

WASHINGTON, May 28 .- The main interest in the proceedings of the senate this week centers in the prospective contest over the sugar schedule, which will probably be reached tomorrow.

The consideration of the metal schedule having been concluded Saturday, the wood schedule is the only one standing before sugar. The principal debate on the wood schedule will be on the subject of lumber, which, having been put on the free list when so many other articles of raw material are made dutiable, will arouse an animated discussion.

It is possible that the special committe which is investigating the alleged opera-tions of the Sugar trust in connection with legislation, may claim the attention of the senate for a portion of the week. There is also a possibility of adjourning over for Decoration Day. The Republican opponents of the bill will probably suggest this adjournment, but the Democrats have not yet decided whether they will agree to the proposition.
Senator Jones has expressed the opinion

that the sugar schedule could be disposed of in two days, but their opponents do not think it can be gotten out of the way in so short a time. Senators on both sides of the chamber are looking forward to the vote on sugar with an interest that amounts almost to anxiety.

Of Much Significance. It is evident that the result of the con test over this schedule will be regarded in a large measure as a test of the strength of the respective sides on the bill as a whole. If the committee amendments should be accepted, the Democrats expect to have smooth sailing on other portions of the bill until the income tax shall be reached, and are even hopeful that, with sugar disposed of, they will be able to get the opponents of the bill to name a day for taking the vote on the

passage of the bill.

The Republican leaders say, however, that the bill is one which, from its nature requires to be discussed by schedules, and that it would be difficult for this reason to agree upon a day for the vote and be sure that the consideration of the schedules would be completed by the time agreed upon.

After the sugar debate there probably will be no long speeches, unless they be effort in connection with the sugar schedule, to have the bounty of the present law

The Week in the House will be much broken by special orders and adjournment over Decoration Day. The state bank debate has the right of way, but it can get but three days in the week at the best. Today is District of Columbia Day, and the state bank men consented not to infringe on it. The bank bill will be taken up tomorrow, when Representative Johnson will make the opening Republican speech in opposition to state banks, and Representative Cox will open for unconditional repeal of the state bank tax. Representatives Warner release. (N. Y.), Walker (Mass.), Rayner (Md.) and Harter (Ohio), are also down for

speeches, some of which will go over or account of Decoration Day. The bank question will get another day follow the state bank bill. It is hardly jured by the flying debris. expected, however, that either of them can be reached during the week.

The Chess Championship of the World Won by Lasker.

MONTREAL, May 28.—Emanuel Lasker won the chess championship of the world and the stakes of \$2000 a side. Saturday by defeating William Steinitz in a queen's

gambit, declined after 52 moves. The Teuton had the opening move, and the game proceeded on the same lines to the 11th move as the 11th game of the match. At this point Steinitz varied from the preceding game, but afterward was entirely outclassed on the ending, and lost the exchange on the 29th move.

He struggled on, and but for accurate play on the part of Lasker would have too much, and he gracefully resigned at the 52d move, proposing three cheers for

the new champion of the world.

The new champion is 26 of age. He was born in Berlinchen, Germany, and played a fairly good game in his 12th year. When 21 years old he defeated Baron von Bareleben, and he took second prize in the Amsterdam chess congress of that year. The two feats stamped him as a master at the game, and in the following year he was hailed as the coming chess player, as he went from one great victory to another. He won seven out of nine games against the veteran Bird, and defeated such sterling players as Blackburne, Lee, Miniati, Mason and Gunsburg. His last meeting with Blackburne was two years ago, when Lasker won a match in six straight games. He came to America i that year an I won against Delman, Lip schutz, Showalter and others of our bes players.

Last October he won first prize in the Columbian congress at New York, win-ning 13 games in 13, a clean score against in international team.

Negotiations for a match with Steinitz were began, and after some inevitable hitches incident to such matters, the play ers were finally brought together in New York. The terms of the match were 10 games up-four won games in New York and three each in Philadelphia and Montreal. The result has been stated. Mr. Steinitz is 58 years old, and resign

a position of champion, which he has held virtually since 1862—more years than any of his pred essors. He has always been a striking figure in the chess world, an as probably done more to spread a popu lar knowledge of the game than any other single player. His notions have alled down a lot of criticism at time, but in matches for the championship he has been able to take care of himself.

brotherhood in Lenox Lyceum, for the interchange of opinions and concentration of effort on all questions of mutual interest, and to agree upon a line of action to follow in securing state and national legislation for the future. The delegates were tardy in getting to-

gether, but when the gavel fell at 11:30 play on the part of Lasker would have drawn, but the odds of the exchange was had assembled, with Executive Committeeman Weisz in the chair. There were representatives present from every state in the Union, from the Republic of Mexico and from the Dominion of Canada. They seemed imbued with a feeling that one mighty federation should be made of all the brotherhoods, now only federated in railroad systems, and with this accomplished, such legislation could be obtained at the hands of all governments on this continent as should reduc in a marked degree the risk to life and limb, which every operator now under goes while engaged at his daily work. There were three sessions held yesterday -that in the morning was for organiza-tion; in the afternoon for preparation, and in the evening an open meeting for

explanation. The leading speakers of all the brotheroods made public statements of their work and calling. The session tomorrow will be behind closed doors, the result of which, however, will be made public. C. E. Weisz, in calling the convention to order, said that no doubt every delegate had received his instructions from the respective divisions and lodges to which he belonged, so that it was unnecessary for him to enlarge upon the

reasons for the gathering. He would therefore introduce at once Hon. T.

A communication was read from the annual convention of the Car Inspectors' association, request ng recognition and admission of three delegates, which was at once granted, and C. E. Lewis, past chief, J. V. Frost, assistant inspector, and Paul Setzer, su-preme chief, were admitted to full privi-

Unscrupulous dealers are trying to sell ordinary Glauber Salt or a mixture of Seidlitz Powder as "Artificial Carlsbad Salt,"
"Sprudel Salt," "German Salt" or "Improved Carlsbad Salt," and under other smilar names. The Natural Remedies of Carlsbad can not be imitated.

What Nature makes, man can not improve." Artificial made wines will never replace the natural juice of the grapes. Neither can the natural waters of Carlsbad, nor the Carlsbad Sprudel Salt be replaced by the cheap substitutes offered to a guileless public for the sake of the larger profit made thereon, by these unscrupulous dealers. No one would buy artificial wines know-

ingly. Why buy the imitations of the Carlsbad products, when your health is at stake The Carlsbad Sprudel Waters are a specific for all diseases of the stomach, liver and kidneys, and have been used with great benefit by ndreds of thousands of people. The Carlsbad Sprudel Salt, which is evaporated from the Sprudel Water at Carlsbad, is an excellent Aperient, Laxative and Diaretic; is an alterative and eliminative remedy, which dissolves tenacious bile, allays irritation, and removes obstruction by aiding nature, and not by sudden and excessive irritation, as most cathartics do. The summer months. when plenty of out-door exercise can be had, are the most desirable for the "Carlsbad Cure." Use the imported Carlsbad waters, or if it is not convenient to use the waters, or when a more decided laxative effect is desired, use the Carlsbad Sprudel Salt.

Bates, pres dent, and Charles Geisster, secretary, of the Carpenters' union; D. H. Hogan of the Carpenters' union, and Rev. E. Evans Carrington, all of Colorado Springs, came to the city yesterday, with the hope that something might be done to settle the controversy that has arisen in connection with the strike.

They were very courteously received by President Calderwood and other repr sentatives of the union. A conference was held at which it was stated that the delegation, entirely of its own responsibility, had come in the interest of peace and arbitration of all differences.

The principle of arbitration is one of the fundamental ideas of the union, and it is now believed that an understanding can be reached. In the meantime ther is to be a complete cessation of hostilities on all sides. LUMBER THE SUBJECT

Senator Hale Working For New

MR. WALSH MAKES HIS DEBUT.

WASHINGTON, D. C., May 29 .- The senate spent eight hours yesterday discussing the question of free lumber. Not a vote was taken. The tariff bill placed lumber in the rough on the free list. The debate was upon Mr. Hale's proposition to transfer lumber to the dutiable list at the rates fixed in the McKinley law. Senators Frye and Hale of Maine and Mitchell and Dolph of Oregon, whose states are more particularly interested in the lumber industry, occupied the major portion of the time in the support of Mr. Hale's amendment.

Mr. Frye (Rep., Me.) said that Canada was one of the worst enemies the United States had. She was too small for us to fight, and had, therefore, instituted and kept up a system of "nagging," like that of tearing down the American flag the other day and distributing its pieces through the street. With free iron, coal and lumber Canada would, he said, drive

great lakes. An amendment to Mr. Hale's amend free list, and impose a duty of 25 cents and 75 cents when planed on both sides

of New England, whose only reliance for be destroyed

selling wheat at 30 cents a bushel and who were getting nothing for their cattle and horses, could not be protected; but the price of lumber was to be put up on them. And for what? In the name of American labor. The tariff bill went over without action

on either of the pending amendments. Walsh's Maiden Speech, Senator Walsh (Dem., Ga.) made his maiden speech, saying in part that the south is destined to become the greatest manufacturing section of the United States. Hence the absurdity of charging that the south is seeking to destroy the manufacturing industries of the country

The south favors the income tax, not from sectional or partisan motives, but because it is equitable and right. Senator Aldrich said yesterday that the sugar schedule of the tariff bill would be reached before Thursday. He thinks will not be concluded before the close o the session today, and that the senate will adjourn over Wednesday for Me-

Music, "Forth to the battle."

Scripture reading.

Music, "Fatherland." Colonel Charles H. Porter was then introduced. He spoke of his boy classmates of the Quincy High school, all of whom had offered their lives for their country. The speaker referred to a book of war

scenes which he left for inspection, to the number killed and wounded, and to the survivors returning to a life of peace. He paid an eloquent tribute to Lincoln and ulogized Grant.

In closing Col. Porter left two lessons: (1.) The lesson of war. War's barbarity. Moral courage is as essential in times peace as in times of war.

The principal controversy at the meeting of the City Council, Monday evening, was over the report of Committee! on Licenses granting a common victualler's license to J. A. Stetson Pierce. It is reported at ength below.

Twenty members were present, the absentees being Councilmen Babcock Litchfield and Snow. A communication was received from the

parish assessors of First Church, extending an invitation to the City Council to attend in a body the installation of Rev. E. C. Butler as pastor. Placed on file.

A communication of Mayor Hodges enclosed bids received by the Commissioner of Public Works, for the wiring of the council chamber and committee rooms for electric lighting. Referred to committee. Licenses.

Application for licenses were received as follows: Common Victualler, - William Slaun

Intelligence office, -Miss E. Hewins. To sell naptha, -John W. Nash. To sell fireworks, -Agawam Pharmacy

Hunting's tent show,-W. H. Evans. A Remonstrance.

Councilman Anderson presented a remonstrance signed by Theophilus King, Edward H. Dewson, Henry H. Faxon and other prominent citizens objecting to common victualler's license being granted to J. A. Stetson Pierce.

Reports of Committees. The Committee on State Aid recommended \$2 increase to Catherine Burke and \$6 per month to Margaret Merritt.

The Committee on Finance reported amendments as to payment of loan of \$5,000 for the Squantum causeway. Amended and read second time. The Committee on Finance recommended that the appropriation for the extension of street sprinkling to include Water, Willerd and Foster streets and Newport

NOTICE TO INVENTORS.

THERE Was never a time in the history of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing discrepancies. Too great care cannot be exering the remedy to overcome existing dis-crepancies. Too great care cannot be exer-cised in choosing a competent and -kilful attorney to prepare and prosecute an appli-cation for patent. Valuable interests have been lost and destroyed in innumerable in-stances by the employment of incompetent counsel, and especially is this advice appli-cable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. C., representing a large number of important daily and weekly papers, as well as general periodicals of the country, was instituted to protect its patrons from the unsafe methods heretofore employed in this line of business. The said Company is prepared to take charge of all patent business entrusted to it for reasonable fees, and prepares and prosecutes applications generally, including mechanical inventions; design patents, trade marks, labels, copyrights, interferences, infringements, validity reports, and gives especial attention to rejected cases. Cold, cloudy weather, with almost daily rainfall, has characterized the weather for the week just passed, until Your palate is your stomach's conscience. weather for the week just passed, until the last two days, when it has been much

the last two days, when it has been much warmer, with considerable sunshine.

Except in southern portions of Maine the rain has not been heavy enough to damage crops or hinder work to any extent, and nearly all report that crops have made rapid advancement. New seeded made rapid advancement. New seeded pieces are improving very fast; grain looks well; pastures are abundant. Clover promises well in Aroostook county, and grass has generally made a large growth for this time of the year. Some potatoes are coming up in Aroostook county, and early ones have been hoed in Penobscot county. In Piscataquis and Penobscot counties the apple, pear, plum, etc., are in full bloom, and the prospect is good for a full crop. Apples and strawberries are coming into blossom in

New Hampshire and Vermont, The heavy and continued rain and lack of sunshine has injured crops to some ex-tent in central and southern New Hampshire and Vermont, and has delayed farm work to considerable extent. The rains have started grass along wonderfully in fields and pastures, but hoed crops have advanced very slowly, and in some places the potatoes and corn have begun to rot and will have to be replanted. In the northern part of the states none too much rain fell, and grass is not looking so well, and is growing slowly in pastures. Crops are coming up well and growing fast.

In the northern part of these states and

practically no damage was done by the frost of the 221, but from central and southern New Hampsh co plaints of quite serious injury. In Rockingham county the temperature was down to 29°, and beans, corn, potatoes, currants, etc., were badly frosted. In Hillsboro county the ground froze in places, and strawberries, beans, cucumbers, etc. were cut down.

A newspaper clipping shows extreme damage in Cheshire county, stating that in the Ashuelot valley the frost was so severe that water was frozen solidly in pipes which were exposed, and plants were killed under thick covering. It o Johnson Bros. Market o states further that farmers in all dire tions say that early apples and other fru ts are all killed, and that clover grass and grains were badly injured. Although the correspondents are uncertain about the damage to fruit crop, none of them hint such destruction, and we trust that later developments will show that the first fears were too great. There seems no doubt but some early fruit was injured of the 22d and that of two weeks ago, on lowlands where the fog did not gather. Much fruit and other crops were save t in these states, as well as in Massachusetts, on the 22d by a thick fog that spread over many valleys and well up onto hillsides.

Gast now. The rain delayed farm work, but no complaint of the seed rotting has been received. The frost injured cranber. ries in the vicinity of Marshfield, and strawberries, to a more or less extent, throughout the state, except in part of the highland district in central Worcester county. In the extreme northern part of this county currants were killed by the frost, low-bushed blueber-ries were much damaged and highbushed ones to some extent. The correspondent from Winchendon states that there is likely to be but few early apples, and that the frost of the 15th did more damage there than most other correspondents reported. Wild grape vines are loaded in Bristol county. Pears are setting finely in Essex and Middlesex counties, and wild berries are blooming very the state of the setting has beginn in the ting finely in Essex and Middlesex counties, and wild berries are blooming very full. Tobacco setting has begun in the Connecticut valley. Canker worms are at work in unusual numbers in parts of Bristol and Essex counties.

Rhode Island and Connecticut. In Rhode Island the weather has been cloudy and foggy, but the rain has not been excessive. All crops are pushing forward very fast. Hoeing has begun and the future looks promising. In central and western Connecticut, however very little work has been done on the land during the week. Some seed is rotting and other seed is coming up slowly. The earliest potatoes were well up and hoed and are doing finely, but many planted just before the rain are rotting. Meadows and pastures are much im proved, although, as in the other states, old fields will not be improved to great extent. The rye crop is heavy, and while some correspondents report that it has stood up well, others say that it is badly lodged. There is no report of serious damage by the frost, and fruit does no seem to have suffered to any extent by the earliest cold spells. There is generally a large quince blossom. Onion plants that had turned white from the drought are now growing luxuriantly.

Other Sections of the Country. For the week ending May 21, the weather was cool and wet over most of the eastern part of the country. Ic formed in Wisconsin and snow fell in Michigan, Indiana and Kentucky, the last named state being covered with from two to eight inches of snow in the eastern and central portions on the 20th. The strawberry picking had begun in New Jersey and was very promising. Fruit is falling badly in West Virginia, but holds good in Michigan. A light hay crop is being harvested in California.

The Cold Wave Retards Crop's.

Thin people are thin because the food they eat doesn't make them fat. Reasons: wrong food; right food ill-digested.

Fats, eil and grease will not make anybody fat. They keep a fat person fat, but they make thin people grow thinner. The reason is because they are indigestible. The thin person finds it hard to digest his food. Fatty food makes it hard to digest his food. Fatty food makes it harder still for him.

Doctors forbid dyspeptics food cooked in grease, yet they will prescribe a fay! The best doctors know that cod liver oil is just as indigestible as any other oil or grease. They prescribe Faskola, a Pre-Digested food, instead.

ADJOURNED SINE DIE.

The Presbyterians Rush Final Busines Through-Dr. Smith's Case.

SARATOGA, May 29.-The 106th general assembly of the Presbyterian church adjourned last night. The final business of the body was put through with unusual dispatch and without any slight sign of the work done. Dissatisfaction has been expressed by

some of the moderately conservative com-missioners at the composition of the committee appointed to confer with the seminary directors as to the new plan of semi-pary control, and especially concerning the committee appointed to advise with the trustees of Lane seminary. The resolutions on temperance were

more moderate than for several years, and yet brought out more opposition than usual. The resolutions concerning appropriations for sectarian schools were passed with great unanimity and were ordered sent to the members of congress and to the constitutional convention now in session at Albany.

An attempt was made to pass a resolution, which would explain that the votes cast to "sustain in part" the specificatution, and to consider schem s for its tions of error in the appeal of Professor Smith were not considered as showing any sympathy on the part of such voters to the views of Professor Smith, but the resolution was greeted with groans and calls of "Docket," "Docket." Invitations were received from the First

Presbyterian church of Seattle and the covered two hours later.

Third church of Pittsburg, for the Assembly to meet with them next year. On account of the expense that would be involved by a trip to Seattle, the former invitation was declined. The invitation to Pittsburg was accepted. After some further routine business,

the assembly was declared adjourned MAHER THE WINNER.

Looking Toward a Receivership, St. Paul, May 29.—A Portland (Or.) special to The Dispatch says: An atempt is being made to force the Oregon Railway and Navigation company into the hands of a receiver. If that is done it will affect the cutting off of the western end of the Union Pacific system. The step contemplated may mean the ultimate control of the company by the Spring Overcoats, Great Northern. As soon as the receiver-ship is accomplished, the Oregon Railway and Navigation company will be completed from Portland to Astoria. Dupuy to Form a Cabinet.

Paris, May 29.-It was announced last evening that M. Dupuy has finally consented to form a cabinet. MM. Del Casse, Barthou and Felix Faure will co-operate with him. It was announced that M. Dupuy's cabinet will be made up as follows: Premier and minister of foreign affairs, M. Dupuy; minister of marine, M. Felix Faure; minister of war, M. Mercier; minister of finance, M. Poincare; minister of justice, M. Guerin; minister of commerce, M. Barthou.

Ramsay Exonerated.

DENVER, May 29.-The convention of Railway Telegraphers, after a full investigation of the charges against Grand Chief Ramsay, has exonerated him. Carl Smith and F. E. Gilleland of Omaha withdrew the charges made by them, as the witnesses on whom they depended on could not be produced.

Breckinridge's Motion Overruled. WASHINGTON, May 29.-Judge Bradley washington, May 29.—Judge Bradley overruled the motion made by the counsel for Breckinridge to file a bill of exceptions, by virtue of which the suit of Miss Madeline Pollard against him might be carried to a higher court on appeal. The effect of this, apparently, will be to prevent an expeal heigh taken. will be to prevent an appeal being taken. Phil Dwyer Discharged.

# PATENTS

### FOR INVENTIONS.

Equal with the interest of ti ose having claims against the government is that of INVENTORS, who often lose the benefit of valuable inventions because of the incompetency or inattention of the attorneys employed to obtain their patents. Too much care cannot be exercised in employing competent and reliable solicitors to procure patents, for the value of a patent depends greatly, if not entirely upon the care could be illegated. entirely, upon the care and skill of the attorney.

With the view of protecting inventors from worthless or careless attorneys and of seeing that inventions are well protected by valid patents, we have re-

tained counsel expert in patent practice, and therefore are prepared to

Obtain Patents in the United States and all Foreign Countries, Conduct Interferences, Make Special Examinations, Prosecute Rejected Cases, Register Trade-Marks and Copyrights, Render Opinions as to Scope and Validity of Patents, Prosecute and Defend Infringement Suits, Etc., Etc.

If you have an invention on hand send a sketch or photograph thereof, to London, May 29.—Valentine Cameron Prinzep, the painter, has been elected a Royal Academician. Mr. Prinzep has been an associate member of the Royal academy since 1879.

If you have an invention on hand send a sketch or photograph thereof, gether with a brief description of the important features, and you will be at once advised as to the best course to pursue. Models are seldom necessary. If others are infringing on your rights, or if you are charged with infringement by academy since 1879.

As the day wore on the liquor began to show its effect, and as night approached the crowd were for the most part howling drunk. While in this state the natural result followed, a general row, in which all hands participated.

Word was sent to Chief Hayden, and as the hour was about 7 o'clock, it was not many minutes before Chief Hayden and Officers McKay, Hanson, Nicol, Ferguson, Connelly, Sandberg and Hunt were on their way to the scene of action.

Arriving there, Chief Hayden at once took in the situation and the two express wagons being pressed into service as hurryup wagons, thirteen of the drunkest of the crowd were bundled in and carted to the police station, where they were put into the several chambers of this hotel. Then it was that the gang commenced to talk, and for a while the cursing and howling was something terrible to hear.

It was reported that one of the party, named Thomas Dunn, of 121 Brighton street, had been drowned, but as yet the report has not been verified.

The story is that four of the party went out in a boat which was capsized and all hands thrown into the water. Three of come ashore, but the fourth man, Dunn, had not been seen, and as none of the party could throw any light upon his whereabouts, it is thought that possibly he may have been drowned.

This morning it was learned beyond doubt that Dunn, the man reported as having been drowned, escaped a watery grave, and that when he got out of the water he but took a car and went home alone.

Memorial Day.

Where are our thoughts upon the day, When many years ago; Brave soldie:s left their happy homes, To fight for good or woe.

Do we think of those loyal men, Who sacrificed their lives; The Union to protect and save, And keep its sacred ties.

Memorial Day should be to all, A time when love abounds;

Tell as our freedom crowns. Our tears should fall upon the soil, Where once in winter nights: Lay dying, dead and wounded men, Beneath the sky's soft lights.

Then let us hail that precious day, And deck those graves with flowers; For the U.S. A. of to-day,

Is freedom's land and ours.  $-Ruth\ Bassett.$

NOTICE TO INVENTORS

THERE Was never a time in the histor of our country when the demand for inventions and improvements in the arts and sciences generally was so great as now. The conveniences of man-kind in the factory and work-shop, the household, on the farm, and in official life, require continual accessions to the appurtances and implements of each in order to save labor, time and expense. The political change in the administration of government does not affect the progress of the American inventor, who, being on the alert, and ready to perceive the existing deficiences, does not permit the affairs of government to deter him from quickly conceiving the remedy to overcome existing dispersions of the conceivation of crepancies. Too great care cannot be exercised in choosing a competent and skilful attorney to prepare and prosecute an application for patent. Valuable interests have been lost and destroyed in innumerable interests by the applicancy of the proposed in the completion. cances by the employment of incompetent counsel, and especially is this advice applicable to those who adopt the "No patent, no pay" system. Inventors who intrust their business to this class of attorneys do so at imminent risk, as the breadth and strength of the patent is never considered in view of a mick andeavor to get an allowance and obof the patent is never considered in view of a quick endeavor to get an allowance and obtain the fee then due. THE PRESS CLAIMS COMPANY, John Wedderburn, General Manager, 618 F street, N. W., Washington, D. C., representing a large number of important daily and weekly papers, as well as general periodicals of the country, was instituted to protect its patrons from the unsafe methods heretofore employed in this line of business. The said Company is prepared to take charge of all patent business entrusted to it for reasonable fees, and prepares and prosecutes applications generally, including mechanical inventions, design patents, trade marks, labels, copyrights, interferences, infringements, vacopyrights, interferences, infringements, va-lidity reports, and gives especial attention to rejected cases. A Brutal Tramp Assaults and Outrages a Young Girl.

MASSACHUSETTS TOWN THE SCENE

The Dastard Succeeds In Making His Escape.

GREENFIELD, Mass., May 31.-William Sessler, a respectable and widely known resident of East Colerain, started with his family for Greenfield yesterday to visit friends and attend the Decoration Day selebration. He left at home a bright and pretty 15-year-old daughter, who is loved by everyone in the neighborhood. When the family returned last evening they found the daughter unconscious, with a severe cut in her throat, cuts and scratches on other portions of her body and outraged. The girl was at work in the kitchen

when she was startled by the appearance of a tramp. She attempted to run from the room, but the tramp grabbed a big chopping knife and threatened to kill her. A Desperate Struggle.

There was a struggle, when he grasped her by the throat, choked her and struck her savagely with the knife. She finally got away and ran to her chamber. The brute followed her, and succeeded in accomplishing his purpose. The girl fainted from loss of blood, and laid on the floor unconscious for some time.

When she recovered, she jumped from her chamber window to the ground, a distance of 15 feet, and ran to the house of a neighbor. Not a man was to be found in the neighborhood, but the woman, to whom she told her story, cared for her until her father's return, when a physician was summoned and the police The whole neighborhood is aroused, and if the tramp is caught he will be lynched.

Masons and Catholics Clash Over the Maid of Orleans Statue.

PARIS, May 31.-Yesterday being the anniversary of the death of Joan of Arc, deputations from several Masonic lodges placed a large floral wreath upon the statue of the Maid of Orleans in the Rue des Pyramides. The wreath was in-scribed: "To Joan of Arc-abandoned by royalty-burned by the church."

The inscription caused a riot. wording was seen by a number of young Catholics, who gathered in a body and made a dash for the statue. The Masons had in the meanwhile reassembled, and when the young Catholics removed the there was a free fight between the Masons and the Catholics, during which sticks were freely used. Finally the police charged upon the combatants and dispersed them, after making a number of

# PATENTS

### FOR INVENTIONS.

Equal with the interest of those having claims against the government is that of INVENTORS, who often lose the benefit of valuable inventions because of the incorrections. of the incompetency or inattention of the attorneys employed to obtain their patents. Too much care cannot be exercised in employing competent and reliable solicitors to procure patents, for the value of a patent depends greatly, if not entirely, upon the care and skill of the otternorm. entirely, upon the care and skill of the attorney.

With the view of protecting inventors from worthless or careless attorneys,

and of seeing that inventions are well protected by valid patents, we have retained counsel expert in patent practice, and therefore are prepared to Obtain Patents in the United States and all Foreign Countries, Conduct laterferences, Make Special Examinations, Prosecute Rejected Cases, Register Trade-Marks and Copyrights, Render Opinions as to

Scope and Validity of Patents, Prosecute and Defend Infringement Suits, Etc., Etc. If you have an invention on hand send a sketch or photograph thereof, to gether with a brief description of the important features, and you will be at once advised as to the best course to pursue. Models are seldom necessary. others are infringing on your rights, or if you are charged with infringement by others, submit the matter to us for a reliable OPINION before acting on the
